POWERED BY:

EQUIPMENT MAINTENANCE MANAGEMENT PROGRAM

WHY CHOOSE AN EMMP?

The Equipment Maintenance Management Program (EMMP) is an insured program that achieves significant savings by consolidating service contracts and providing an asset management system. The program consolidates a member's qualified equipment under one program that improves the standard of care for the entity's equipment, identifies poor performing equipment, manages strategic vendor relationships, improves equipment performance, and delivers significant immediate "hard dollar" savings, without disrupting business practices or operations.

COST REDUCTION

Save 25% off your current service contract pricing with the quality and coverage of your existing service.

VENDOR NETWORK

Provides an unbiased vendor solution that provides timely and qualified service in accordance with Original Equipment Manufacturer (OEM) specifications.

CONSOLIDATION

Manages the maintenance of multiple equipment types under one fixed-price agreement with the flexibility to customize equipment coverage.

ADMINISTRATIVE TIME

Reduces the time that you spend administering multiple service contracts from various equipment manufacturers and service providers.

We analyze your current equipment maintenance portfolio, maintenance agreements, historical maintenance expenditures, and operational practices to develop a customized program to meet your unique needs. The goal of each program is to deliver the specialized management tools, expertise, and support necessary for you to achieve enhanced equipment performance coupled with significant cost savings.

GENERAL OFFICE

Automated Filing Systems
Collating Machines
Counters
Dictation Equipment
Encoders
Endorsers
Micrographics Equipment
Office Automation Equipment
Printers
Scanners

SECURITY

Alarm Systems
Card Access Systems
Fingerprint Scanners
Metal Detectors
Multiplexers
Radiation Detection
Vaults & Safes
Video Surveillance
X-Ray Screening Equipment

COMMUNICATION

Audio/Visual Systems
Paging Systems
Radios
Telephone Systems
Voice Mail Systems

RESEARCH LABORATORY

Analyzers
Autosamplers
Centrifuges
Chromatography Systems
CO-oximeters
Densitometers
DNA Extractors
DNA Synthesizers
Electron Microscopes
Fluorometers
Flow Cytometers
Freezers
Gamma Counters
Histology Equipment
Lasers
Mass Spectrometers
Microplate Reader
Microscopy (SEM/ TEM)
Particle Counters
PCR Detection
Physiological Monitoring
Portable X-Ray Machines
Projectors
Scintillation Counters
Sequencers
Special Procedure Rooms
Spectrophotometers
Tissue Processors

MAIL ROOM

Addressing Systems
Bar-coding Equipment
Binding Machines
Bursting/Cutters
Collators/Decollators
Inserter Systems
Labeling Systems
Mail Machines
Sorters

INFORMATION TECHNOLOGY

Archiving Systems
Laptop/ Workstations
Network Devices
Network Storage
Servers

**PLUS OTHER TYPES OF EQUIPMENT
ELECTRONIC IN NATURE.**

Certain models of equipment may not be eligible due to parts & labor exclusivity and/or availability. List Subject to Change.
