CAJPA Public Sector Risk Survey

CAJPA is working on a study to determine public sector risk management needs. The objectives of the study are to identify individual risk managers' information and skills gaps, help risk managers perform effectively in an organizational setting, and help the risk management community elevate its status within the public sector and within society in general.

Please take the time to complete the Public Risk Management Needs Survey and help CAJPA and the other associations supporting this project. The survey will take approximately 15 minutes, and responses are due no later than August 1, 2014.
