Members, Board of Directors
CSAC Excess Insurance Authority

Ladies and Gentlemen:

Fiscal year 2018/19 was a successful year for the CSAC Excess Insurance Authority (the EIA or the Authority). All programs of the EIA are fully funded and continue to maintain a surplus (net position), membership has grown in most programs, and program structures have improved in spite of some challenging reinsurance renewals this year. Demand for the EIA's services is strong and the Member Services Department is responding to meet this demand.

The EIA continues to be a leader in our industry. We are recognized as one of the largest and most successful pools in the nation. For 2018/19, our annual revenue was \$1.03B, and for 2019/20 we estimate the revenue to be around \$1.14B.

Membership is growing at a steady and healthy pace. Year-over-year, our number of members as well as the number of member units (each member in each major program) increased. There are now 2,019 entities, including members of members, who are covered in one or more of our major programs.

A captive insurance company, the Excess Insurance Organization (EIO or the Captive), domiciled in and subject to the Utah Insurance Department's regulations, was formed to insure only the Authority's risks, celebrated its third year of operations. The EIO investment program continues to perform very well with the total rate of return on the equity portfolio returning 10.23%, 11.13% and 5.12% in the 2016/17, 2017/18 and 2018/19 years, respectively. The surplus position of the EIO, including the initial capital contribution of \$5M by the EIA, grew from \$13.7M to \$24.2M during the 2018/19 fiscal year. The EIO took on the risk transferred from the EIA within fixed corridors in the workers' compensation, liability and property programs. In 2018/19, the EIO covered an earthquake quota share risk in the Authority's property program from March 31, 2019 to March 31, 2020. The EIO took on an aggregated risk of \$10M for a premium of \$168k. This layer is not fully funded to the aggregate but the actuarially calculated expected loss in this layer is \$0. Over \$313M in premiums has been collected by the EIO in the first three years of operations from six EIA programs. The EIO covered \$157M of corridor risk in program year 2018/19 as compared to \$104.9M in program year 2017/18. In total, the EIO covered fixed risks of \$349M across all participating programs in its three years of existence.

Development of a proprietary Claims Management Information System (CMIS) and National Expansion was the focus of the Executive retreats of 2019 and 2018, respectively. EIA requirements for a CMIS are unique due to the fact that we operate excess programs and require a high degree of customization to replicate our primary data base from third party claims administrators. Therefore, EIA staff was directed to develop a detailed business plan to create our own proprietary CMIS for our own internal use as well as making it available to our members. Staff is diligently working on the business plan and a decision will be made later this year on

whether to take this initiative on, or not. National Expansion will enable EIA to reach outside of the State of California to spread and diversify risk, leverage reinsurance markets, and to identify and implement industry-wide best practices. Actual implementation will be on a program-by-program basis, as directed and approved by the Authority's Board. Staff, along with the EIA brokers are working on this initiative and it is anticipated necessary documents will be finalized and a marketing campaign will commence in the near future.

The EIA increased staffing levels with 6 new positions designed to meet the growing needs and complexities of our membership during 2018/19, and 4 new positions were approved for the 2019/20 year in the Information Technology, Liability Claims and Employee Benefits departments.

All these strategic initiatives influence our Comprehensive Annual Financial Report. The EIA is responsible for the accuracy, completeness, and fairness of the presentation, including all disclosures.

Based upon our comprehensive framework of internal control, we believe our report is accurate in all material respects, that it fairly sets forth the financial position and results of operations of the EIA, as measured by the financial activity of its various programs and policy periods, and that all necessary disclosures for understanding the report have been included. Because the cost of control should not exceed the benefits to be derived, our objective is to provide reasonable, rather than absolute assurance, that our financial statements are free of any material misstatements.

Gilbert CPAs, independent auditors, has issued an unmodified opinion that the Authority's financial statements, for the fiscal years ended June 30, 2019 and 2018, are fairly presented in conformity with Generally Accepted Accounting Principles. The independent auditor's report is presented as the first component of the financial section of this report.

Management's Discussion and Analysis (MD&A) immediately follows the independent auditor's report. The MD&A provides a narrative introduction, overview, and analysis of the basic financial statements. The MD&A complements this letter of transmittal and should be read in conjunction with it.

WHO WE ARE

CSAC Excess Insurance Authority is a Joint Powers Authority (JPA) established under Article 1, Chapter 5, Division 7, Title I of the California Government Code (§ 6500 et seq.) in October 1979. The EIA provides two classes of membership – county members (county entities maintaining their membership in the California State Association of Counties) and public entity members (any other public entity in California). The 62 member Board of Directors is comprised of representatives from each of the 55 county members appointed by their respective Boards of Supervisors, and seven public entity representatives (plus three alternates) elected by the public entity membership.

The EIA has over 350 members, consisting of 55 counties and 295 public entities. The 55 member counties represent more than a 95% market share of the 58 California counties. Public entity membership consists of individual cities, schools, or special districts, and 28 joint powers authorities consisting of pools of cities, schools, or special districts. The members collectively represent approximately 2,000 public agencies. Over 130 public agency members from 90 entities actively participate in the Authority's policy making and governance by their service on the Board of Directors and committees.

WHAT WE DO

The EIA operates programs for excess and primary workers' compensation, two excess liability programs (including an option for primary liability coverage), a property program, a medical malpractice program, a master rolling owner controlled insurance program, an employee health benefit program, a dental program and miscellaneous programs for other coverages. The EIA also provides support services for selected programs such as claims administration, risk management, claims audits, loss prevention and training, and subsidies for actuarial studies and risk management services. The EIA's reporting entity includes financial activities relating to all programs and insurance pools of the Authority and the newly formed captive.

THE RENEWAL CYCLE

The EIA operates in an environment that is affected by the evolving exposures of our membership as well as the overall insurance market. The EIA's programs typically feature layers of member self-insurance, layers of pooled risk, and layers of risk transfer to the commercial insurance market. Based on the loss trends of our membership and the state of the insurance market, the structure of the EIA's programs evolve to provide the most stable and least costly solution for our members.

The least stable environment is the liability market where the industry, public entities in particular, are seeing significant increases in plaintiff demands and high dollar liability claims. Increasing jury verdicts and settlements are impacting the industry's surplus. As the industry is affected, the EIA's liability programs have also experienced higher claim costs. Due to adverse loss development and the hardening liability insurance market, GL1 and GL2 members worked through a difficult renewal for 2018/19, with the GL2 Program in particular seeing modest premium increases, some coverage limitations, and additional aggregate limits.

The General Liability 1 (GL1) Program faced its own challenges due to a sudden increase in loss development from the first 3 quarters of 2018/19. This resulted in a drop in net position of nearly \$21M since June 30, 2018. In response to the adverse loss development and the deterioration of the Program's surplus, the EIA Board approved a Loss Portfolio Transfer (LPT) deal. This deal transfers the Program's liabilities to a reinsurer, MultiStrat Re, going back to July 1, 2007, thereby stabilizing the program's funding position, and also providing coverage for liabilities over the next 5 years (through June 30, 2024). As a result of the LPT, the GL1 Program's net position is \$22.1M at 6/30/19 or otherwise equivalent to approximately the 70% confidence level.

We have successfully used multi-year reinsurance agreements to stabilize rates in the GL1, Property and Medical Malpractice Programs. We have also used Rate stabilization plans (RSP) to help stabilize expected reinsurance costs for our members in our EWC and PWC programs. RSPs are a predetermined agreement with the carrier that outlines what the potential premium decrease or increase would be for the renewal if loss development for the new year falls within a certain range. The other tool typically used to respond to changing market conditions is to expand and contract pooled risk layers. This can be done with a traditional un-aggregated pooled layer that is funded based upon actuarial recommendations, or on an aggregated corridor basis.

Our EIAHealth program continues to produce stable and equitable renewals, issuing a below trend renewal increase for the 2019 plan year. Employee Benefits, which includes Dental, Vision, Life/Disability and Employee Assistance, continue to offer flat rate renewals that include multi-year rate guarantees. EIAHealth Program renewed flat in 2018 and with a 3.9% rate increase in 2019. Of note, is the PPO Dental segment that continues to use accumulated program equity to

lower renewals for all program segment members. All other lines of coverage are in multiyear rate guarantees and will not renew until 2021.

PRIMARY WORKERS' COMPENSATION

The Primary Workers' Compensation (PWC) Program provides first dollar coverage to its members up to the \$125K limit, at which point coverage then feeds in to Excess Workers' Compensation (EWC) Program. The Program provides members with claims administration services and several cost containment programs including a Medical Provider Network (MPN), a 24/7 Nurse Triage Service, and a Return-to-Work Program. The Program pays for claims with a blending of pooling (both un-aggregated pooling and corridor pooling) and excess insurance. In 2018/19, the structure of the PWC Program provided that the first \$10k of each claim is paid out of the Program's pool and the Program's excess insurer pays for the balance of the claim, up to the program limit of \$125k, per occurrence. This layer is also subject to a corridor retention of \$14.3M that was transferred to the EIO.

The PWC program continues to build equity. The Program ended the 2018/19 year with surplus of \$32.7M. For 2018/19, rates on average decreased for all members.

The PWC Committee has declared dividends since 2007/08 every year except fiscal year 2017/18. In fiscal year 2018/19, PWC Committee declared a \$2M dividend for the program. In 2018/19, the corridor was increased from \$12M to \$17M and was subsequently adjusted to \$14.3M based on membership changes. The corridor risk was again transferred to the EIO.

EXCESS WORKERS' COMPENSATION

The Excess Workers' Compensation (EWC) Program provides members with statutory coverage for workers' compensation subject to the members' self-insured retentions ranging from \$125k to \$5M. Because members maintain self-insured retentions in this Program, they are able to manage their own claims, either through a third party of their choice or with their own claims staff. There are two towers in this program - the Educational Tower for our school members and the Core Tower for all of our other members.

In our Educational Tower, the Program funds a pool between \$125k and \$2.5M subject to member self-insured retentions and purchases reinsurance above the pooled layer to secure statutory limits.

In the Core Tower, the Program funds a \$5M pool, subject to member self-insured retentions and purchases reinsurance to secure statutory limits. Pooled layers for both of these towers are also subject to a large corridor retention that was transferred to the EIO. The Pool layer (both towers) continues to be reinsured with Great American and the EIA maintained a \$48.3M Corridor Retention for 2018/19, which was shared between the Educational Tower and the Core Tower. The Educational Tower maintained a \$7M corridor in its primary layer. Both corridors were transferred to the EIO.

GENERAL LIABILITY 1

The GL1 Program provides members with coverage for third party liabilities (including general, automobile, employment practices, and errors and omissions), up to a limit of \$25M, subject to each member's self-insured retention, which can range from \$100k to \$1M (retentions as low as \$25k can be provided on an exception basis). The Program also offers a \$10k deductible through the Deductible Buy Down (DBD) option, previously known as the Primary General Liability (PGL) Program, for those who want to transfer more risk. Members in the DBD option who have a deductible, are required to utilize one of the Program's contracted third party claim administrators. All other members who maintain a self-insured retention are able to manage their own claims, either through a third party of their choice or with their own claims staff. The Program funds a \$5M pool and purchases \$20M in reinsurance from various reinsurers to achieve the \$25M limit. Within the first reinsurance layer of \$5M to \$10M, there is a single \$7.5M corridor for the combined 2015/16, 2016/17, and 2017/18 years that is transferred to the EIO. The corridor in this layer increased to \$10.5M for the next 3 years of 2018/19, 2019/20, and for 2020/21.

Net position in this Program had been stable in the range of \$30M to \$40M until 2017/18 fiscal year. At June 30, 2018, the net position had deteriorated to \$8.8M due to adverse development in claims. As explained earlier, the EIA entered into a Loss Portfolio Transfer deal with MultiStrat Re to transfer their claims from July 1, 2007 to June 30, 2024. As of June 30, 2019, net position for this program has increased to \$22.1M as a result of the program's liabilities transferred to Multi Strat Re. Recent adverse loss development is an industrywide phenomenon being felt by most entities in the General Liability insurance market.

GENERAL LIABILITY 2

The GL2 Program provides members with coverage for third party liabilities (general, automobile, employment practices and errors and omissions), up to a limit of \$25M, subject to the member's self-insured retention, which range from \$1M to \$5M. Some members also have Individual Member Corridor Deductibles (IMCD) sitting on top of their member self-insured retention. The GL2 Program was specifically designed with the objective of offering larger members the advantages of the joint purchase of excess coverage, while maintaining their ability to handle and fund their primary losses, and manage their own claims. Each member of the Program (with a few exceptions) has a representative on the GL2 Committee, which was established to administer and govern the Program. Within the first reinsurance layer between a member's self-insured retention to \$10M, there is a large group corridor deductible (\$24.5M for 2018/19) that sits on top of the members' self-insured retentions and IMCDs, if applicable. The corridor is transferred to the EIO. Due to market conditions and the loss experience of the GL2 membership, the reinsurance purchased on first \$10M layer is subject to an annual aggregate limit, which is well in excess of expected claim payments.

PROPERTY

The Property Program provides coverage for physical damage to members' real and personal property as a result of "all risk" perils, limits up to \$ 800M in All Risk, in 2018/19 and \$600M in Flood. Members also have the opportunity to purchase additional earthquake coverage. The members who purchase earthquake coverage have access to \$540M in earthquake coverage in one or more of six towers. The unique structure of the Program into Towers spreads risk both geographically and categorically. This spread of risk allows the Program to access higher limits at reduced costs. The Program renews on March 31 of each year. The pool exposure is comprised of an aggregate all-risk corridor of \$10M and an aggregate auto physical damage corridor, both

of which are covered by the EIO. This Program has a pool that is designed to buy-down member deductibles for the Catastrophic Flood and Earthquake losses of up to \$5M for flood and \$30M for earthquake. The members continue to add monies to this pool, which is currently funded at \$19.5M. The structure of the Program evolved to allow the public entity tower to share earthquake limits within the Tower and with the earthquake rooftop layer. During the 2019/20 renewal, Lexington, the Program's long-time reinsurer on the primary layer, has elected not to extend to a third-year (2021/22) after many years of having a rolling 3-year agreement. Starting in 2021/22, the EIA placement may become a 1-year placement versus the usual 3-year pre-paid placement. As a sign of the hard market, coverage was reduced during the 2019/20 renewal. EQ limits dropped from \$540M to \$465M, flood limits dropped from \$600M to \$300M, and all-risk limits were reduced from \$800M to \$600M. The EIA retained the aggregate EQ risk of \$25M excess of \$440M, with 40% of that risk being transferred to the EIO for a premium of \$168k.

MEDICAL MALPRACTICE

The Medical Malpractice Program provides members with coverage for medical professional services and limited general liability exposures at established healthcare facilities. The Program offers limits of \$21.5M, in addition to each member's deductible or self-insured retention, which range from \$5k to \$1.1M. For members who maintain a \$5k or \$10k deductibles, claims administration is provided by the Program's third party administrator, Risk Management Services. Members who maintain a self-insured retention above those deductible limits are able to manage their own claims. The Program funds a \$1.5M pool on a claims-made basis and purchases \$20M of reinsurance on an occurrence basis. This Program has an annual renewal date of October 1 each year. The EIA has entered into a multi-year reinsurance deal with Medical Protective Company (Med Pro) for the 2018-2020 period. This year's renewal for 2018/19 with Med Pro renewed at a flat premium with a not-to-exceed premium amount of 10% for the 2019/20 renewal as specified in the multi-year agreement.

MASTER ROLLING OWNER CONTROLLED INSURANCE PROGRAM

The Master Rolling Owner Controlled Insurance Program (MR OCIP) enables members to purchase workers' compensation and general liability coverage for all eligible parties (owner, general contractor, and sub-contractors) working on their construction projects. These policies (also known as "wrap-ups") are widely used on public sector construction projects and capital improvement programs. The MR OCIP had historically included projects as small as \$10M; thereby enabling members to receive the benefits of a "wrap-up" on projects that otherwise would not qualify because of their size. This Program continues to see growth with two new members added.

EIAHEALTH

The EIAHealth Program, in partnership with Self Insured Schools of California (SISC), provides members with an alternative to group health insurance plans using the concept of pooling to reduce insurance premiums through consolidating the fixed costs over a larger population. Members are able to create and maintain their own plan designs within the context of the pooling arrangement that provides much greater stability than a standalone program. In addition, small group programs are available with predefined benefit options for public employers with less than 200 employees/retirees. HMO options are also available to members on an insured basis. The Program experienced a 10% growth in membership in 2019, adding 4 new members representing additional 3000 employee/retiree lives. Membership now covers 42 entities, providing coverage for 35,000 employees/retirees.

DENTAL

Since 2010, the EIA Dental Program has offered two segments of participation: pooled (fixed-rate) and standalone self-funded. In 2019, another pooled segment was added; the Dental Health Maintenance Organization (DHMO). The DHMO is a fee for service, fully insured product that offers members a cost-effective alternative to traditional PPO dental coverage. The Program partners with Delta Dental to provide administrative services and access to the Delta Dental network of providers. The administrative fees in the Program are some of the lowest offered by Delta Dental of California. In light of the Program's strong net position (\$17.1M as of June 30, 2019), the Employee Benefits Committee has approved a rate structure in each of the last three years to subsidize rates by as much as \$2M per year.

AWARDS & ACKNOWLEDGMENT

The Government Finance Officers Association (GFOA) of the United States and Canada awarded a Certificate of Achievement for Excellence in Financial Reporting to CSAC Excess Insurance Authority for its Comprehensive Annual Financial Report (CAFR) for the fiscal year ended June 30, 2018. This was the 25th consecutive year that the Authority has received this prestigious award. In order to be awarded a Certificate of Achievement, a government must publish an easily readable and efficiently organized comprehensive annual financial report. This report must satisfy both generally accepted accounting principles and applicable legal requirements.

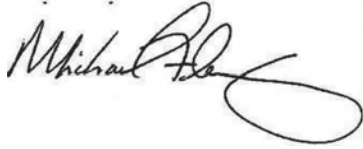

A Certificate of Achievement is valid for a period of one year only. We believe that our current comprehensive annual financial report continues to meet the Certificate of Achievement Program's requirements and we are submitting it to the GFOA to determine its eligibility for another certificate.

The Authority is a member of the California Association of Joint Powers Authorities (CAJPA). CAJPA sponsors the nation's first risk management accreditation program. This program establishes a model of professional standards, which serves as a guideline for all risk management pools regardless of size, scope of operation or membership structure. The accreditation process entails a detailed examination of legal and operational documents, risk management, loss control and claims programs, and statutory compliance. In March 2019, CAJPA renewed the Authority's "Accreditation with Excellence," the highest form of accreditation, for a three-year period ending in March 2022.

The Authority is a member of the Association of Governmental Risk Pools (AGRIP). AGRIP, a national organization comprised of over 200 pools across the nation, has established Advisory Standards, which are an industry specific method for pools to conduct a comprehensive review and evaluation of internal operational procedures. The Advisory Standards prescribe best practices for pools in categories such as governance, staffing, claims management, finance, business continuity, and data security. Pools that meet the Advisory Standards are granted Recognition for three years. In 2016, the EIA renewed Recognition with AGRIP by demonstrating compliance with the Advisory Standards. Staff are currently completing the evaluation for the 2019 Recognition.

The preparation of this report would not have been possible without the best efforts of the Finance and Administrative Departments and we thank them for their contribution. We commend the members of the Authority's Finance Committee and Executive Committee for their support in maintaining the highest standards of professionalism in the management of the Authority's finances, and each Board of Director member and alternate, and all committee members, for their commitment to the Authority.

Respectfully Submitted,

Michael Fleming
Chief Executive Officer

INDEPENDENT AUDITOR'S REPORT

**Board of Directors and Members
CSAC Excess Insurance Authority
Folsom, California**

Report on the Financial Statements

We have audited the accompanying financial statements of CSAC Excess Insurance Authority (the Authority) as of June 30, 2019 and 2018, and the related notes to the financial statements, which collectively comprise the Authority's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America, the State Controller's *Minimum Audit Requirements for California Special Districts*, and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Authority as of June 30, 2019 and 2018, and the changes in financial position and cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America, as well as accounting systems prescribed by the State Controller's Office and state regulations governing special districts.

Other Matters

Required Supplemental Information

Accounting principles generally accepted in the United States of America require that the management's discussion and the required supplementary information, as listed in the table of contents, be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audits were conducted for the purpose of forming an opinion on the financial statements that collectively comprise the Authority's basic financial statements. The Supplemental Information Section, as listed in the table of contents, is presented for purposes of additional analysis and is not a required part of the basic financial statements.

The Supplemental Information Section is the responsibility of management and was derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the Supplemental Information Section is fairly stated, in all material respects, in relation to the basic financial statements as a whole.

The Introductory Section and the Statistical Section, as listed in the table of contents, are presented for the purposes of additional analysis and are not a required part of the basic financial statements. They have not been subjected to the auditing procedures applied in the audit of the basic financial statements and accordingly, we express no opinion on them.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued our report dated December 4, 2019, on our consideration of the Authority's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, and contracts and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the Authority's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Authority's internal control over financial reporting and compliance.

Management's Discussion & Analysis

As management of the EIA, we offer readers of the EIA's financial statements this narrative overview and analysis of the financial activities for the fiscal years ended June 30, 2019, 2018, and 2017. All references to years are to the fiscal year ending at June 30th.

Overview of the Financial Statements

The EIA reports as a government enterprise fund because its activities, the development and operation of public entity risk pools (Retained Risk), and group purchase of insurance (Transferred Risk) are paid for by its member users.

The EIA's basic financial statements are comprised of three components: 1) Authority-wide financial statements including the EIO, a component unit; 2) notes to the financial statements; and 3) fund financial statements. This report also contains other supplementary information in addition to the basic financial statements.

The *Authority-wide Financial Statements* are designed to provide readers with a broad overview of the EIA's finances, in a manner similar to a private-sector business.

The *Statement of Net Position* presents information on all of the EIA's assets, deferred outflows of resources, liabilities, and deferred inflows of resources. Assets plus deferred outflows of resources minus liabilities and deferred inflows of resources is reported as net position. Net position includes the amount invested in capital assets, net of related debt.

The *Statement of Revenues, Expenses and Changes in Net Position* presents information showing total revenues and total expenses and how the EIA's net position changed during the most recent fiscal year. All revenues and expenses are recognized as soon as the underlying event occurs, regardless of the timing of related cash flows. Thus, revenues and expenses are reported in this statement for some items that will only result in cash flows in future fiscal periods (e.g., claims incurred but not paid, unrealized market gains on investments, earned but unused vacation leave, and net pension liability).

The *Statement of Cash Flows* presents information on the sources and uses of cash during the most recent fiscal year. The Statement of Cash Flows is subdivided into three major sections to show cash provided or used by Operating, Capital and Related Financing, and Investing Activities.

The Authority-wide financial statements can be found on pages 40 through 44 of this report.

Notes to the Financial Statements

The notes provide additional information that are essential to a full understanding of the data provided in the financial statements and can be found beginning on page 45 of this report.

Captive

On June 30, 2019, the Authority's captive insurance company, the EIO, a blended component unit of the Authority, completed its third year of operations. The EIO is domiciled in, and subject to, the Utah Department of Insurance regulations to insure only the Authority's risks. The EIO allows the Authority to better link their long term claim liabilities with an appropriate type and term of investment. See Footnote 3 for the Investment Policy of the EIO and Footnote 4 for a schedule of the liabilities insured through the EIO. The governing board is made up of current EIA Board, committee, and staff members along with EIA General Counsel and Utah Counsel.

Management's Discussion & Analysis

Fund Financial Statements

The EIA operates one enterprise, proprietary fund to account for its 10 risk management programs, general administration and operation of the EIA's building, and the EIO. Each program has established its own set of accounts so that each program can be independently evaluated.

The following table shows the net position in each fund:

	Net Position
Primary Workers' Compensation	\$ 32,733,155
Excess Workers' Compensation	57,780,895
General Liability 1	22,049,996
General Liability 2	1,303,715
Property	22,749,650
Medical Malpractice	13,793,361
Master Rolling Owner Controlled Ins. Program	375,430
EIAHealth	1,864,226
Dental Program	17,095,340
Miscellaneous Programs	1,987,023
Administration and Building	9,141,700
EIO net of Elimination	19,157,362
Total Net Position	\$ 200,031,853

Financial Highlights

Authority-Wide Financial Analysis

The EIA's assets and deferred outflows exceeded liabilities and deferred inflows by \$200M as of June 30, 2019, by \$122.6M at June 30, 2018, and by \$140.5M at June 30, 2017. Following is a condensed Statement of Net Position:

	June 30, 2019	June 30, 2018	June 30, 2017
Other Assets	\$ 665,521,210	\$ 824,109,709	\$ 781,525,113
Capital Assets	10,072,121	10,205,042	9,838,240
Total Assets	675,593,331	834,314,751	791,363,353
Deferred Outflows	1,227,362	1,718,920	1,537,233
Current Liabilities	321,909,836	183,323,834	153,724,595
Noncurrent Liabilities	444,459,373	528,994,951	497,188,376
Total Liabilities	766,369,209	712,318,785	650,912,971
Deferred Inflows	595,345	1,144,292	1,466,353
Invested in Capital Assets	10,072,121	10,205,042	9,838,240
Unrestricted Net Position	189,959,732	112,365,552	130,683,022
Total Net Position	\$ 200,031,853	\$ 122,570,594	\$ 140,521,262

Management's Discussion & Analysis

Net Position

Net position is defined as the difference between Total Assets plus Deferred Outflows and Total Liabilities plus Deferred Inflows. The EIA started fiscal year 2018/19 with a net position of \$122.6M. Our ending balance in net position at June 30, 2019 was \$200M, increased by \$77.4M from fiscal year 2017/2018. The increase in net position was largely driven by positive development in prior year claims expense; especially in the Workers' Compensation and Medical Malpractice Programs.

The EIA started fiscal year 2017/18 with a net position of \$140.5M. The beginning net position was adjusted down by \$6.2M as a net result of GASB 75 OPEB accounting, the SANDPIPA merger, and reclassification of certain member deposits as Liabilities on the books. Additionally, we had a net loss of \$11.8M in fiscal year 2017/18 after declaring dividends of \$1.1M. Our ending balance in net position at June 30, 2018 was \$122.6M, down \$18M from fiscal year 2016/17. The decrease in net position was largely driven by adverse development in prior year claims expense, especially in the GL1 Program. The adjustment to beginning net position also contributed to this decrease.

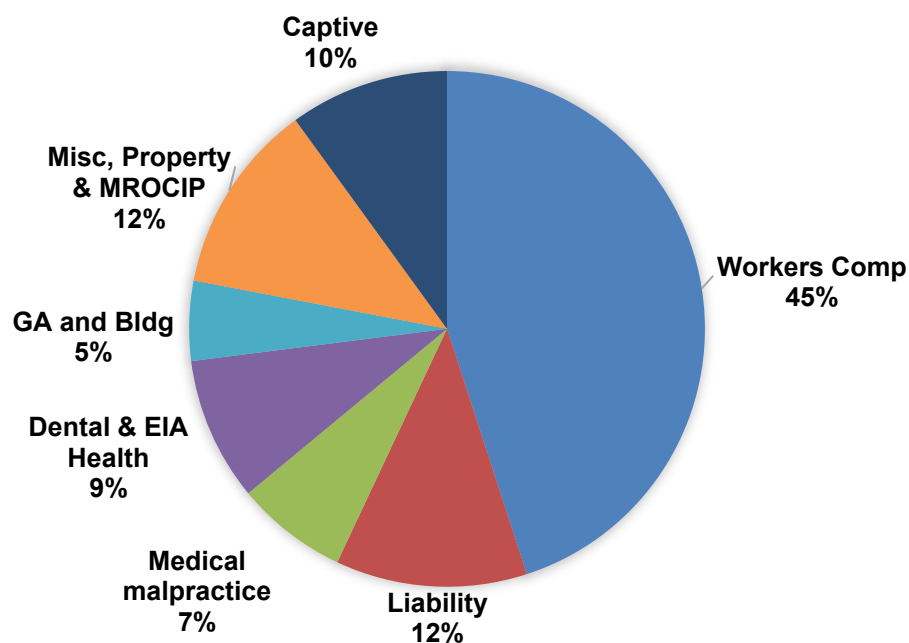

Our net position balances over the past 5 years are illustrated as follows:

Management's Discussion & Analysis

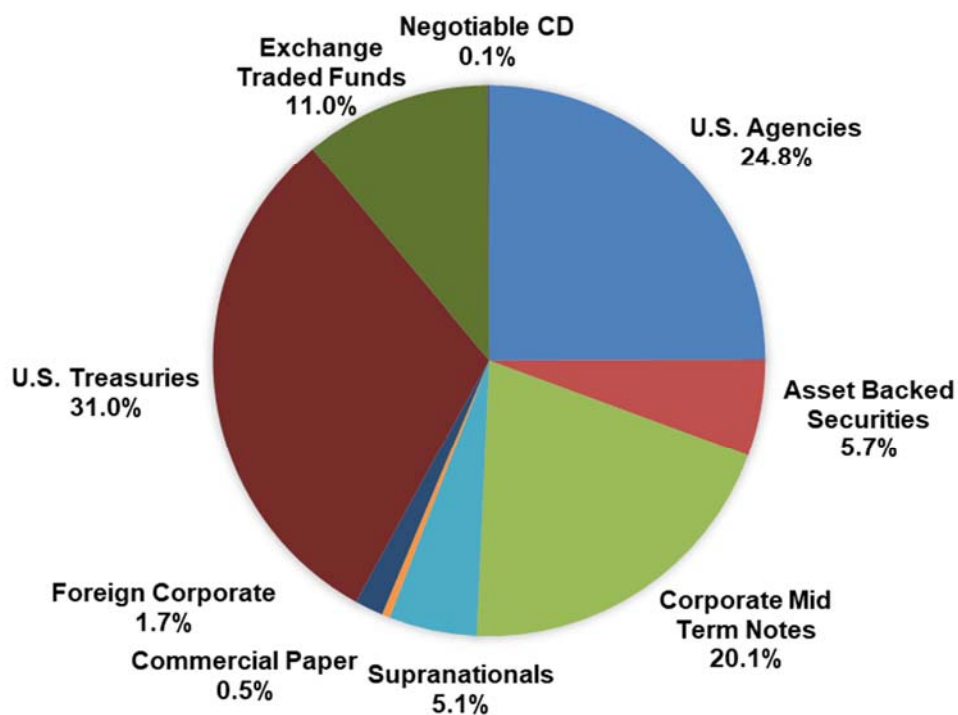

Our large pooled risk programs; workers' compensation and liability programs, account for 57% of net position as of June 30, 2019 as show below:

NET POSITION BY PROGRAM

Approximately 74% of our Treasury assets consist of funds held for the payment of claims. Of these funds, 11% is in cash and 89% is invested. The following chart shows the asset allocation for the invested funds at June 30, 2019:

INVESTMENT ALLOCATION

Management's Discussion & Analysis

During the 2018/19 fiscal year interest rates were volatile but lower on a year over year basis. The decrease in interest rates drove the fair market value of the EIA's current fixed income investments higher, leading to unrealized gains on those investments. During fiscal year 2018/19, there was a net increase in fair value of \$21.1M, compared to a net decrease in fair value in fiscal year 2017/18 of \$7.2M. The increases and decreases in fair market value are primarily being driven by fluctuations in the market interest rate. The potential direction of interest rates, up or down, and the interest earned are both considered at the time the investment is made.

Claims Liabilities

As another year is added on to our programs, some with a long payout pattern, claim liabilities will naturally increase. Claim payments will cause a decrease in outstanding claim liabilities. Claim liabilities decreased from \$664.5M as of June 30, 2018 to \$538.4M at June 30, 2019. A decrease of \$144M in claim liabilities for the GL1 Program and \$53M in the EWC program, respectively, contributed to the overall reduction in claim liabilities in 2018/19. GL1 Program claim liabilities decreased as a result of a GL1 Loss Portfolio Transfer to MultiStrat Re during fiscal year 2018/19. PWC and Medical Malpractice Programs had an increase in claims liabilities despite positive claims development in prior years while EIO claim liabilities increased by \$82.2M in fiscal year 2018/19.

Claim liabilities increased from \$610.7M as of June 30, 2017 to \$664.5M at June 30, 2018. An increase of \$30.8M and \$72.2M in claim liabilities for the GL1 Program and the EIO, respectively, contributed to the overall increase in claims liabilities. The decrease of \$56.1M in claim liabilities for the EWC Program provided some offset to the overall increase. On July 1, 2017, the Authority merged with SANDPIPA (a JPA of Cities in San Diego County) and assumed all outstanding claim liabilities in their GL1 Program.

In August 2016, the California Insurance Commissioner placed Castlepoint Insurance Companies (Castlepoint) in conservatorship. Castlepoint has been in liquidation since March 1, 2017. California Insurance Guarantee Association (CIGA) is administering the liquidation and paying claims. Our Primary and Excess Workers' Compensation Programs had coverage through Castlepoint. Although CIGA has paid on some claims, it has issued denials if other insurance is available to cover the exposure. The total exposure to the Authority that is considered unrecoverable is approximately \$4.8M, discounted, and this amount is included in claim liabilities.

Our PGL Program has operated successfully since 1998 providing low deductible coverage for members that do not want the risks associated with self-insured programs. However, the PGL Program faced unique challenges that impacted its ability to self-insure the pooled risk, and spread EIA administrative charges to its members. As a result, effective July 1, 2018, the GL1 Program assumed the current claims liabilities and all future risks of the PGL Program. The claim liabilities as of June 30, 2019 are included in the EIA's total claims liabilities.

Our claim liabilities are discounted, meaning they are stated at the present value of the future stream of claim payments. The discount rate is based on what the EIA expects to earn on the funds set aside to pay claims. The rate of return on invested funds has been less than anticipated since the recent recession started in 2008. In fiscal year 2011, the EIA made significant adjustments to the discount rates. In 2012, 2013, and again in 2016, the EIA adjusted our discount rates lower to reflect the continued low interest rate environment. The claim liability trend over the past five years is as follows:

Management's Discussion & Analysis

Pension Liability

The pension liability was \$1.4M, \$1.6M, and \$1.1M at the end of fiscal years 2018/19, 2017/18, and 2016/17 respectively. The Authority merged with SANDPIPA (a JPA of Cities in San Diego County) as of July 1, 2017, and became the successor in interest to SANDPIPA's California Public Employers' Retirement (PERS) contract. Adjustments have been made to the PERS calculations to provide a conservative transfer of this risk. Because of this merger during the fiscal 2017/18, the Authority's beginning net pension liability, deferred inflow of resources, and deferred outflow of resources were adjusted to reflect net pension liability, deferred inflow of resources, and deferred outflow of resources of SANDPIPA.

Other Post Employment Benefit (OPEB)

For the year ended June 30, 2018, the Authority implemented GASB Statement No. 75 (GASB 75), Accounting and Financial Reporting for Post-Employment Benefits Other Than Pensions. In 2017/18 OPEB liability calculations were based on blended discount rate. OPEB liability consists of explicit and implicit liability. The EIA's current policy is to prefund only the explicit liability, creating an unfunded liability for the implicit portion. Since fiduciary net position is not sufficient to pay all future obligations, in FY 2018/19, the EIA Finance Committee approved use of a split rate to discount future obligations. The Authority will use long term rate of return when future projected benefits that can be covered by trust assets, while future projected benefits not covered by the available trust assets shall be discounted by the 20-year municipal bond rate. These two components are then simply added together to calculate the total OPEB liability.

This approach is more logical and straightforward since EIA has a clear line drawn around what will and will not be prefunded. EIA reported Net OPEB liability of \$601k for 2018/19 and \$823k for 2017/18.

Target Equity

Each of the pooled programs have established Target Funding Guidelines, which determine the range of net position to retain in the program in order to provide for the uncertainty of actuarial estimates, inconsistent or inaccurate reserving, and the possibility of catastrophic claims. The purpose of the guidelines is to assist members in making funding decisions. A range is

Management's Discussion & Analysis

determined by looking at various ratios; for instance Gross Premium to Equity, Equity to Pool retention, Outstanding Case Reserves to Equity, and Outstanding Ultimate Reserves to Equity. The following table shows the Target Equity Range for the pooled programs and program net position at June 30, 2019:

Program	Target Equity Range in millions of \$		Program Net Position in millions of \$
	Low	High	2019
Primary Workers' Compensation	18.8	42.2	32.7
Excess Workers' Compensation	34.1	83.4	57.8
General Liability 1	26.6	36.1	22.0
Medical Malpractice	5.1	14.4	13.8

The EWC, PWC, and MedMal Program's net position is well within the target equity range for 2018/19. The GL1 Program's net position is below their Target Equity Range as a result of adverse development in claims. In response to that, the EIA Board approved a Loss Portfolio Transfer (LPT) deal. This deal transfers the Program's liabilities to a reinsurer, MultiStrat Re, going back to July 1, 2007, thereby stabilizing the program's funding position, and also providing coverage for liabilities over the next 5 years (through June 30, 2024). As a result of the LPT, the GL1 Program's net position is \$22.1M at 6/30/19 or otherwise equivalent to approximately the 70% confidence level. Recent adverse loss development is an industrywide phenomenon being felt by most entities in the General Liability insurance market.

The following is a condensed Statement of Revenues, Expenses, and Changes in Net Position.

CSAC Excess Insurance Authority Statement of Revenues, Expenses, and Changes in Net Position

	June 30, 2019	June 30, 2018	June 30, 2017

Management's Discussion & Analysis

Revenues

Total revenues were \$1.03B during 2019, an increase from \$895M in 2018. All programs have reported higher total revenue compared to 2018 except PWC program due to overall rate reduction. An increase of \$31.8M in investment income also contributed to an increase in total revenue compared to fiscal year 2017/18. Additionally, both premium and pool revenue are up partly due to rising payrolls, which is the exposure base for many programs. For the 2018/19 renewal, the GL1, GL2, Property, EWC Excess layer and Health had rate increases whereas the Dental, EWC pool, PWC, and DBD Programs had rate decreases.

In fiscal year 2017/18, total revenues experienced an increase from the \$772M in fiscal year 2016/17 to \$895M. All programs reported higher total revenue compared to 2017 except the PWC, PGL, and Miscellaneous Programs. Increase in investment income also contributed to an increase in total revenue compared to fiscal year 2016/17. Additionally, both premium and pool revenue is up partly due to rising payrolls which is the exposure base for many programs. For the 2017/18 renewal, the GL1, GL2, EWC (excess layers) and Medical Malpractice Programs experienced rate increases, whereas the Dental, EWC (pool layer), PWC, and PGL Programs had rate decreases. The rates were flat for the Property and EIAHealth Program renewals.

The total revenue allocation as of June 30, 2019 is shown in the following chart:

Membership The Authority represents over 2,000 public agencies statewide. Our membership includes 95% of the counties in California and nearly 70% of the cities, as well as numerous school districts, special districts, housing authorities, fire districts, and 28 other Joint Powers Authorities. There was some movement in membership in most of our programs with a net increase of 19 members for a total of 740 in 2018/19 up from 721 in 2017/18. Our employee benefits programs continue to add new members and our new MR OCIP (wrap-up program for major construction contracts) added several new projects to our pooled program. In addition to cities, counties, and special districts we insure directly, we cover an additional 1,627 members who are part of other Joint Powers Authorities that participate in our programs.

Management's Discussion & Analysis

Premiums for Transferred Risk Premiums for transferred risk increased from \$545.6M in 2017 and \$650.3M in 2018 to \$698.1M in 2019, up 7% from 2018. Much of this increase is in our Liability, Property and EIAHealth programs. Due to economic recovery, payrolls across members are increasing, which is the exposure base for workers' compensation and general liability programs.

Contributions for Retained Risk The EIA's contributions for retained risk revenues were \$265.1M in 2019, compared to \$212.8M last year and \$196.1M in 2017. The contributions for retained risk, together with investment earnings, are used to finance the provision for claims. We have also experienced increase contribution for retained risk as we have expanded our corridors and transferred those to our newly established captive.

Expenses

Total operating expenses increased by \$43.7M in fiscal year 2018/19 compared to \$137.7M increase in 2017/18 when compared to fiscal year 2016/17. The significant increase in both years 2017/18 and 2018/19 was due to increase in insurance expense, primarily in the EIAHealth program, with a corresponding increase in revenue. The increase in fiscal year 2018/19 expenses was offset by a decrease of \$134.8M in claims expense primarily from the GL1 program due to the Loss Portfolio Transfer explained above.

Operating expense compared to revenue is shown in the following chart:

Significant expense items in fiscal year 2018/19 included:

- Member dividends included \$2.2M to members of the PWC Program, EIAHealth and Miscellaneous Program members.
- Insurance expense increased by \$172.3M, mirroring the revenue increase in premiums for transferred risk for all programs except for the GL1 LPT Layer, for which the premiums of \$124M were paid to transfer claims to another reinsurer and a corresponding reduction of claims expense of \$167.2M was recorded in the expense section itself.

Management's Discussion & Analysis

- The provision for claims is a management estimate of the cost of pooled, or shared, claims. This estimate is based on a variety of actuarial and statistical techniques considering claims history, claim payment history and frequency, changes in the law, inflation, and other socio-economic factors. Because our claims are discounted to the present value, the effect of changes in the discount rate is included in the provision for claims. The provision for claims expense decreased by \$134.8M from \$231.2M in 2018 to \$96.4M in 2019 mainly due to prior year claim cost in GL1 program reduced \$167.2M as a result of Loss Portfolio transfer to MultiStrat Re. A corresponding insurance expense of \$124M was recorded as a price of this Loss Portfolio Transfer.
- Unallocated Loss Adjustment Expense (ULAE) expense decreased by \$5.1M from 2018 to negative \$574k in 2019 as the ULAE liability decreased from \$50.1M at June 30, 2018 to \$49.5M at June 30, 2019.
- General Administrative expense was 3% higher in 2019 at \$13.3M compared to 2018. General Administrative services include salaries and benefits of the EIA staff, meetings and conferences, office expenses, and other expenses necessary for the operation of the EIA.
- Other program and member services expense was slightly lower by 1% at \$15.8M in 2018/19 fiscal year as compared to \$16M in 2017/18 fiscal year.

The actuarial subsidy is \$2k, available in many programs. All members of the property and casualty programs are eligible for a risk management subsidy of \$1k per program. In 2018, a total of \$8.9M reclassified from the net position to the Authority's liabilities on the Statement of Net Position because these are being held by the EIA on behalf of their members. Therefore, Risk Management subsidy is no longer considered an expense but reduction of liability.

The following chart shows the total dollars that were distributed through member subsidies for the last five years:

Management's Discussion & Analysis

The EIA offers a variety of Risk Control, Claims, and Risk Management services for our members. The services offered include:

- Expanded TargetSolutions offerings to include Special Education, a new Driver Training Program and 25 courses for Law Enforcement.
- Created a POST Certified Course on De-Escalation that will be held in 10 member locations.
- Created a Fire Apparatus Inspection Application Program.
- Created a Physical Abilities Testing Program.
- Added CrewSense (Workforce Management Software) for public safety.
- Implemented the QuickStart Guides to assist service implementation.
- Created a Strategic Planning Facilitation service.
- Expanded the Enterprise Risk Consultants Program to offer 18 consultants for special project assignments.
- Added 2 new locations to the Risk Management Practitioners Program.
- Created the Claims Learning Advantage electronic newsletter and many more.

Capital Assets

In January 2010, the new office facility at 75 Iron Point Circle, in Folsom, California was purchased at a cost of \$9.2M. We have invested in tenant improvements, both for the space occupied by the Authority and for the 43% of the building that is leased out. Other investments include scheduled replacements of office equipment and computers, and investments in new technology. Capital assets include scheduled replacements of office equipment and computers, and investments in new technology, including a new phone system. Implementation of the last viable workers' compensation third party administrator into our claims system was completed and opportunities to automate claims management processes were implemented. We are also in the process of evaluating potential development of a proprietary claims system.

Economic Factors

The most significant economic factors that will affect the future of the EIA includes legislation that affects changes in or expands coverage, the insurance market, the investment market, and the financial health of our members. While the property market is beginning to show signs of hardening, sufficient capacity remains for our earthquake and flood risks. There are fewer markets for our workers' compensation program, however, we are still able to reinsure the risk at a competitive cost. The least stable environment is the liability market where we are seeing growing trends toward higher settlements and larger adverse verdicts.

Each EIA program committee is carefully monitoring changes to the insurance market, investment market, and their target equity as they make funding decisions at each renewal. We have successfully used multi-year reinsurance agreements to stabilize rates in the GL1, Property and Medical Malpractice Programs. We have also used Rate Stabilization Plans (RSP) to help stabilize expected reinsurance costs for our members in our EWC and PWC programs. RSPs are a predetermined agreement with the carrier that outlines what the potential rate decrease or increase would be for the renewal if loss development for the new year falls within a certain range. The other tool typically used to respond to changing market conditions is to expand and contract pooled risk layers. This can be done with a traditional un-aggregated pooled layer that is funded based upon actuarial recommendations, or on an aggregated corridor basis.

Management's Discussion & Analysis

Other Information

Annually, as a subcontracted part of the financial audit, the Authority's actuarial data produced by its in-house actuarial staff and used in the production of the year-end financial statements, is peer reviewed by AON Consulting. The AON peer reviewers assess the propriety of the methodologies used and assumptions made in determining the actuarial results and the ultimate loss estimates, which underlie the estimates of IBNR liabilities within self-insured programs. In addition to the AON peer review, Bickmore Actuarial Consulting also performed limited scope peer review in 2018/19.

In addition to the basic financial statements and accompanying notes to the financial statements, this report also presents certain *Required Supplementary Information* reconciling EIA claim liabilities and claim development schedules. In addition, supplemental information on the proportionate share of the net pension liability, on pension plan contributions, a schedule of changes in the net OPEB liability and related ratios, and a schedule of the Authority's OPEB contributions is provided. Required supplementary information can be found beginning on page 89 of this report. The combining and individual program statements for all EIA programs are presented immediately following the required supplementary information beginning on page 106 of this report.

Conclusion

This financial report is designed to provide a general overview of the EIA's finances for all those with an interest in the EIA's finances. Questions concerning any of the information should be addressed to the Chief Financial Officer, 75 Iron Point Circle, Suite 200, Folsom, California 95630.

**CSAC EXCESS INSURANCE AUTHORITY
NOTES TO THE FINANCIAL STATEMENTS
FOR THE FISCAL YEARS ENDED JUNE 30, 2019 AND 2018**

1. Organization and Significant Accounting Policies

The accounting policies of the CSAC Excess Insurance Authority (the EIA or the Authority) conform to accounting principles generally accepted in the United States of America as applicable to governments. The following is a summary of the more significant policies.

A. Organization and Reporting Entity

The Authority is a Joint Powers Authority (JPA) organized in accordance with Article 1, Chapter 5, Division 7, Title I of the California Government Code. The purpose of the entity is to develop and fund insurance programs for member counties and other public entities. The Authority operates public entity risk pools for workers' compensation, employee benefits, comprehensive liability, property, medical malpractice, and pool purchases of excess insurance and services for members.

The Authority is under the control and direction of the Board of Directors (the Board), consisting of representatives of the member counties and other public entities. For purposes of control and daily management, the Authority annually elects an Executive Committee, which consists of a President, Vice President, and nine Directors. The immediate Past President and legal advisor are non-voting (advisory) members of the Executive Committee. The Executive Committee has appointed a Chief Executive Officer.

At the June 2016 Board meeting, the Authority gave staff the go-ahead to establish a captive insurance company, domiciled in and subject to the Utah Insurance Department regulations to insure only the Authority's risks. This allows the Authority to better link their long-term claim liabilities with an appropriate type and term of investment. The Captive, Excess Insurance Organization, Inc. (the EIO or the Captive), is reported as a blended component unit of the EIA. See Footnote 3 for the Investment Policy of the Captive and Footnote 4 for a schedule of the liabilities insured through the Captive. The governing board is made up of current EIA Board, committee, and staff members along with EIA General Counsel and Utah Counsel.

B. Membership

There are two classes of membership; county members and public entity members. Each member has adopted the Joint Powers Agreement and has been approved by the Board of Directors.

County membership is available to California counties whose supervisors are members of the California State Association of Counties (CSAC). Currently, there are 55 counties members of the Authority. Each county member is entitled to appoint two representatives to the Board, one voting and one alternate. County members have nine positions on the Executive Committee.

Public entity membership is open to any other California public entity. Public entity members have seven voting seats (and three alternates) on the Board of Directors. Two seats on the Executive Committee are designated for public entity members.

**CSAC EXCESS INSURANCE AUTHORITY
NOTES TO THE FINANCIAL STATEMENTS
FOR THE FISCAL YEARS ENDED JUNE 30, 2019 AND 2018**

1. Organization and Significant Accounting Policies (continued)

B. Membership (continued)

The following number of members participated in Authority programs, as of June 30, 2019 and 2018:

	2019	2018
Primary Workers' Compensation	41	39
Excess Workers' Compensation	174	175
General Liability 1	128	125
General Liability 2	18	18
Property	104	105
Medical Malpractice	52	52
Master Rolling Owner Controlled Insurance	17	16
EIAHealth	43	37
Dental	163	154

Members are assessed a contribution for each program in which they participate. Members may be subject to additional supplemental assessments, if it is determined that contributions are insufficient. The pool considers anticipated investment income in determining if a premium deficiency exists.

If a program has sufficient net position available, a dividend may be declared. Each member shall be eligible for a portion of the dividend, as determined by the Board or governing committee.

Members may withdraw from the Authority only at the end of a policy period and only if a 60 day written notice is given. The Authority may cancel a membership at any time, upon two-thirds vote of the Board and with 60 days written notice. Upon withdrawal or cancellation, a member shall remain liable for additional assessments for the program periods in which they have participated. Withdrawn or cancelled members are generally not eligible for future dividends, based on the conditions set forth in the Joint Powers Agreement.

C. Significant Accounting Policies

Basis of Presentation and Accounting

The accounts of the Authority are organized on the basis of governmental fund accounting. The Authority operates a single enterprise fund, which is considered a separate accounting entity. An enterprise fund is used to account for governmental activities where the intent is that the cost of providing goods or services is financed primarily through user charges. The Authority's operations consist of ten insurance programs, a miscellaneous program, a general administration program, a building program for the office facility it owns and the newly formed Captive. Each program has established its own chart of accounts for its assets, deferred outflows of resources, liabilities, deferred inflows of resources, net position, revenues, and expenses.

The financial statements of the Authority have been prepared in accordance with accounting principles generally accepted in the United States of America. The Governmental Accounting Standards Board (GASB) is the accepted standard-setting body for establishing governmental

CSAC EXCESS INSURANCE AUTHORITY
NOTES TO THE FINANCIAL STATEMENTS
FOR THE FISCAL YEARS ENDED JUNE 30, 2019 AND 2018

1. Organization and Significant Accounting Policies (continued)

C. Significant Accounting Policies (continued)

accounting and financial reporting principles. As a governmental entity, the Authority follows the accounting standard hierarchy established by the GASB. Basis of accounting refers to when revenues and expenses are recognized in the accounts and reported in the financial statements. Basis of accounting relates to the timing of measurement made, regardless of the measurement focus applied. The accounting records are maintained using the economic resources measurement focus and the accrual basis of accounting. Net operating income includes the cost of providing risk financing and related services, and the expenses related to providing those services. Net non-operating income includes investment income, rental income, and the related expenses. Major revenue accrual entries include member premium receivable and investment income receivable in the EIA and EIO Treasury. Expenses are recognized when goods or services are received, or in the case of claims, when the insured event occurs. Expense accrual entries include liabilities for reported claims and liabilities for claims incurred but not reported. The financial statements are presented on a consolidated basis including the EIO but net of elimination of intercompany transactions between the EIA and the EIO.

Cash and Cash Equivalents

For purposes of the statement of cash flows, the Authority considers cash in banks and deposits in the State of California Local Agency Investment Fund to be cash equivalents.

Investments

Investments are recorded in the Treasury (note 3) at fair value. Investment income is recorded as earned.

Receivables

All receivables are reported at their gross value and, where appropriate, are reduced by the estimated portion that is expected to be uncollectible. Interest on investments is recorded in the year the interest is earned and is considered 100% collectible. The June 30, 2019 and June 30, 2018 balances in the other receivable accounts are considered 100% collectible.

Due from Members

Due from members balance includes Catastrophic Pool revenue receivable for the Property Program for the entire program year renewed annually as of March 31 of each year, as the receivable and corresponding revenue does not relate to a specific period.

Prepaid Expenses

Payments for insurance and other services that extend to future accounting periods have been recorded as prepaid expenses.

Capital Assets

Capital assets include building, furniture, equipment, software, and tenant improvements with an individual cost of \$5k or more. Capital assets are recorded at cost. Expenses for maintenance and repairs are reflected in current earnings as incurred. Upon sale or retirement of an asset, its cost and related accumulated depreciation are removed from the account balances and charged to current earnings.

Depreciation for office furniture, equipment, and software is computed using the straight-line method and an estimated useful life of three to seven years. Depreciation for the office building and tenant improvements is computed using the straight-line method, either over the lease term

1. Organization and Significant Accounting Policies (continued)

C. Significant Accounting Policies (continued)

or the useful life of the component units, as appropriate, with the period ranging from three to sixty years.

Unearned Income

Unearned income includes payments from members or others for future services received, but not earned until a subsequent accounting period.

Unallocated Loss Adjustment Expenses Payable

ULAE includes costs that cannot be specifically associated with particular claims, but are related to claims paid or the process of claim settlement and claims administration services. These costs include the cost of third party administrators in the PWC Program and Medical Malpractice Program to pay claim benefits and manage the claim until it is closed. Costs also include the cost of Authority staff to pay claims and seek recovery from reinsurance carriers. Since the workers' compensation programs have claims that may stay open for benefits until the death of the claimant, the associated ULAE is a significant liability. The discounted outstanding ULAE is as follows:

	June 30, 2019	June 30, 2018
Primary Workers' Compensation	\$ 40,241,000	\$ 41,256,000
Excess Workers' Compensation	6,220,000	5,615,000
Primary General Liability	1,000	48,000
General Liability 1	1,235,000	955,000
General Liability 2	1,043,000	1,073,000
Property	6,000	10,000
Medical Malpractice	788,000	1,151,000
Totals	<u>\$ 49,534,000</u>	<u>\$ 50,108,000</u>

Compensated Absences

The Authority's vacation policy provides for a limited accumulation of earned vacation leave, with such leave being fully vested when earned. A liability of \$558.7k for vacation pay has been computed and recorded, based on the unused days multiplied by the current daily rates of pay.

At June 30, 2019, the current portion of the liability is \$111.7k and the balance of \$447.0k is considered long term.

	Fiscal Year Ended

FOR THE FISCAL YEARS ENDED JUNE 30, 2019 AND 2018

1. Organization and Significant Accounting Policies (continued)

C. Significant Accounting Policies (continued)

The Authority's sick leave policy provides for an unlimited accumulation of earned sick leave. Sick leave does not vest, but any unused sick leave, accumulated at the time of retirement, may be used in the determination of length of service for retirement benefit purposes. Since the Authority has no obligation for the accumulated sick leave until it is actually taken, no accrual for sick leave has been made.

Deferred Outflows/Deferred Inflows of Resources

In addition to assets and liabilities, the statement of net position reports separate sections for deferred outflows of resources and deferred inflows of resources. Deferred outflows of resources represent a consumption of resources that applies to a future period(s) and will not be recognized as an outflow of resources (expense) until then. Conversely, deferred inflows of resources represent an acquisition of resources that applies to a future period(s) and will not be recognized as an inflow of resources (revenue) until that time.

Pensions

For purposes of measuring the net pension liability, deferred outflows/inflows of resources related to pensions, and pension expense, information about the fiduciary net position of the Authority's portion of the CalPERS Miscellaneous plan and additions to/deductions from the Plans' fiduciary net position have been determined on the same basis as they are reported by CalPERS. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value. Contributions made to the Authority's pension after the measurement date, but before the fiscal year-end are recorded as a deferred outflow of resources and will reduce the net pension liability in the next fiscal year.

Additional factors involved in the calculation of the Authority's pension expense and net pension liability include the differences between expected and actual experience, changes in assumptions, difference between projected and actual investment earnings, changes in proportion, and differences between the Authority's contributions and proportionate share of contributions. These factors are recorded as deferred outflows and inflows of resources and are amortized over various periods. See Footnote 8 for further details related to these pension deferred outflows and inflows.

Other Post-Employment Benefits (OPEB)

For purposes of measuring the net OPEB liability, deferred outflows of resources and deferred inflows of resources related to OPEB, and OPEB expense, information about the fiduciary net position of the Authority's portion and additions to/deductions from Authority's fiduciary net position have been determined on the same basis as they are reported by CalPERS. For this purpose, the Authority recognizes benefit payments when due and payable in accordance with the benefit terms. Investments are reported at fair value, except for money market investments and participating interest-earning investment contracts that have a maturity at the time of purchase of one year or less, which are reported at cost.

Additional factors involved in the calculation of the Authority's OPEB expense, and net OPEB liability, include the differences between expected and actual experience, changes in assumptions, difference between projected and actual investment earnings, changes in proportion, and differences between the Authority's contributions and proportionate share of contributions. These factors are recorded as deferred outflows and inflows of resources and

1. Organization and Significant Accounting Policies (continued)

C. Significant Accounting Policies (continued)

amortized over various periods. See Footnote 9 for further details related to these OPEB deferred outflows and inflows.

Classification of Revenues

The Authority has classified its revenue as either operating or non-operating revenues. Certain significant revenue streams relied upon for operations are recorded as non-operating revenues, as defined by GASB Statement 34 including investment income. Revenues and expenses are classified according to the following criteria:

- Operating revenues: Operating revenues include activities that have the characteristics of exchange transactions, such as insurance premiums, assessments for insured events, administration fees, and public entity fees.
- Non-operating revenues: Non-operating revenues include activities that have the characteristics of non-exchange transactions and other revenue sources described in GASB Statement 34, such as investment income and finance charges.

Premiums for Transferred Risk and Contributions for Retained Risk

The EIA's programs blend the purchase of insurance with risk sharing pools. Premiums for transferred risk are resources collected to purchase commercial insurance. Contributions for retained risk are collected to fund our risk sharing pools and share in the cost of claims.

Both premiums for transferred risk and contributions for retained risk are collected in advance and recognized as revenues in the period for which insurance protection is provided. Workers' compensation program contributions are based on estimated payrolls and are adjusted in the subsequent fiscal year, based on actual payroll data.

Contributions for retained risk in FY 2018/19 includes Catastrophic Pool Revenue for the entire program year for Property Program, which was renewed March 31, 2019. The corresponding receivable was recognized as due from members in FY 2018/19.

Provision for Claims

The Authority's programs include both arrangements in which the members combine resources to purchase commercial insurance products and risk sharing pools, where members pool risks and funds and share in the cost of losses. Some programs include elements of both; losses up to a certain amount are pooled, and the Authority purchases excess or reinsurance for losses not covered in the pooled layer. The provision for claims expense represents the pool's expense for claim costs.

Excess Insurance and Reinsurance

The Authority uses excess insurance and reinsurance agreements to reduce its exposure to large losses on all types of insured events. Excess insurance covers claims in excess of each pool's retention layer. Reinsurance permits recovery of a portion of losses from reinsurers, although it does not discharge the primary liability of the Authority as direct insurer of the risk reinsured. The Authority does not report reinsured risk as a liability, unless it is probable that those risks will not be recovered from reinsurance.

NOTES TO THE FINANCIAL STATEMENTS
FOR THE FISCAL YEARS ENDED JUNE 30, 2019 AND 2018

1. Organization and Significant Accounting Policies (continued)

C. Significant Accounting Policies (continued)

Services

Services donated by many officers, directors, and committee members are important to the activities of the Authority. The financial statements do not recognize the value of these donated services, since there is no basis for measuring and valuing these services.

Income Taxes

The Authority is a government entity exempt under the Internal Revenue Code Section 115, and is not liable for federal or state income taxes. The Authority is liable for certain payroll taxes.

Management Estimates

The preparation of financial statements, in conformity with accounting principles generally accepted in the United States of America, requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the reporting date, and revenues and expenses during the reporting period. Actual results could differ from those estimates. Material estimates that are particularly susceptible to significant change in the near term are described elsewhere in this report.

Net Position

Net position represents the net investment in capital assets of \$10.1M, net of accumulated depreciation, and unrestricted net position of \$189.9M as of June 30, 2019, for a total of \$200.0M. The unrestricted net position balances are available for future operations or distribution. The net position as of June 30, 2018, was \$122.6M.

2. Cash

A. Cash and Cash Equivalents

Cash and cash equivalents, as of June 30, 2019 and 2018 are reported at fair value and consist of the following:

	<u>June 30, 2019</u>	<u>June 30, 2018</u>
Cash in Banks		
Primary Workers' Compensation	\$ 1,270,562	\$ 4,681,141

**CSAC EXCESS INSURANCE AUTHORITY
NOTES TO THE FINANCIAL STATEMENTS
FOR THE FISCAL YEARS ENDED JUNE 30, 2019 AND 2018**

2. Cash (continued)

B. Custodial Credit Risk

The carrying amount of the Authority's total cash in banks was \$13.2M at June 30, 2019, and \$14.8 at June 30, 2018. The bank balance was \$18.7M at June 30, 2019 and \$22.4M at June 30, 2018, and was partially insured by the Federal Deposit Insurance Corporation (FDIC). As of June 30, 2019, \$17.9M is in excess of FDIC insured amounts. California law requires depository banks to hold collateral equal to 110% of government funds on deposit. Our investment policy does not address custodial credit risk.

C. Authority Treasury

The Authority pools cash resources of its various programs in order to facilitate the management of cash. Cash available to a particular program is readily identifiable. The balance in the pooled cash accounts is available to meet current operating requirements. Cash in excess of current requirements is invested in various interest-bearing securities, as part of the Authority's investments.

The Authority and EIO's treasury accounts were comprised of the following:

	June 30, 2019	June 30, 2018
Primary Workers' Compensation	\$ 70,722,947	\$ 69,977,884
Excess Workers' Compensation	281,394,079	320,475,617
Primary General Liability	-	1,278,523

General Administration	14,686,912	13,599,520
Building Fund	(6,288,864)	(6,554,581)
EIO	237,915,140	156,541,298
Total Treasury Balances	<u>\$ 723,700,575</u>	<u>\$ 683,459,477</u>

3. Investments

The investments in the financial statements are governed by the EIA and EIO's investment policies.

The EIA's investment policy is designed to achieve an optimum rate of return on available assets not required for current operating needs. Section 53601 of the California Government Code provides the legal authority for investments. An appropriate level of risk shall be maintained by purchasing securities that are liquid, marketable, and high quality. Adequate diversification shall be applied to prevent an undue amount of investment risk with any one institution. The classes of investment that most adequately meet the above mentioned criteria shall be allowed for purchase. They are issues of the United States Government, federal agencies (GNMA, FNMA, FHLB, FFCB, and FHLMC), local government investment pools, municipal bonds including those issued by the State of California, bankers' assistance

**CSAC EXCESS INSURANCE AUTHORITY
NOTES TO THE FINANCIAL STATEMENTS
FOR THE FISCAL YEARS ENDED JUNE 30, 2019 AND 2018**

3. Investments (continued)

Commercial paper, asset-backed and mortgage-backed securities, supranational, money market mutual funds, and medium-term corporate notes. While not as liquid or marketable as prior mentioned securities, repurchase agreements and time certificates of deposit are also allowable investments. The Authority may also deposit investment funds with the State of California Local Agency Investment Fund.

The EIA's investment policy places limits on the purchase of various categories of investments as follows:

Category	Standard
Treasury Notes	No limitations
U.S Agencies	25% Maximum issuer
U.S. Corporate (MTNs)	"A" or higher by at least 1 NRSRO; 30% maximum; 5% max issuer; Issuer is a corporation organized and operating within the U.S. or by depository institutions licensed by U.S.
Municipal Securities	"A" or higher by at least 1 NRSRO; 30% maximum; 10% maximum for CA State issued munis; 5% max issuer for all others
Banker's Acceptance	"A-1" or higher short term rating by at least 1 NRSRO; "A" or higher long term rating by at least 1 NRSRO; 40% maximum; 5% max issuer; 180 days max maturity.
Federally Insured Time deposits	20% maximum; 5% max issuer; FDIC insured; fully collateralized
Collateralized Time deposits	20% maximum; FDIC insured; fully collateralized
Certificate of Deposit Placement Serv.	30% maximum
Negotiable CDs	"A-1" or higher short term rating by at least 1 NRSRO; "A" or higher long term rating by at least 1 NRSRO; 30% maximum; 5% max issuer
Commercial Paper	"A-1" or higher short term rating by at least 1 NRSRO; "A" or higher long term rating by at least 1 NRSRO; 25% maximum; 5% max issuer; issuer assets to be > \$500M; 270 days max maturity
Asset Backed/Mortgage Backed/CMOs	"AA" or higher rating by NRSROs; 20% maximum; 5% max per asset backed/Comm. Mortgage issuer; no limit for US treasury or Agency issuer
Mutual/Money Market Fund	Highest rating by 2 NRSROs; 20% maximum; 10% per fund for Mutual Funds, and 20% for Money Market Mutual Funds
Supranationals	"AA" or higher rating by NRSROs; includes; IBRD, IFC, and IADB; 30% maximum; 10% per issuer
Repurchase Agreements	102% collateralization; not issued by investment advisor
LAIF	Authority may invest up to the maximum permitted by LAIF

Other Stipulations

Max Callable Securities	30% of the portfolio (does not include make whole securities)
Max Per Issuer	5% of the portfolio (except U.S Government, Agencies/GSEs, Supranationals, Money Market Fund LGIP)
Maximum Maturity	5 Years maximum maturity

CSAC EXCESS INSURANCE AUTHORITY
NOTES TO THE FINANCIAL STATEMENTS
FOR THE FISCAL YEARS ENDED JUNE 30, 2019 AND 2018

3. Investments (continued)

The EIO's investment policy identifies procedures that will foster a prudent and systematic investment program designed to seek EIO objectives through a diversified investment portfolio. An appropriate level of risk shall be maintained by purchasing investments within the context of a well-diversified portfolio. Adequate diversification between Equities and Fixed Income securities shall be applied to prevent an undue amount of investment risk with any one area. The EIO strives to achieve returns and control risk by meeting certain asset allocation targets set forth in the EIO investment policy. The classes of investments that most adequately meet the above mentioned criteria shall be allowed for purchase. They are Equity and Fixed Income investments of U.S. and non-U.S. issuers, Real Estate Investment Trusts, and Commodities. The investment policy also lists out some prohibited transactions such as direct short sales of individual securities, direct margin purchases, direct investment in commodities future contracts, direct investment in real estate or direct real estate lending, and hedge funds.

A. Investment Credit Risk

The Authority's investments at June 30, 2019 and 2018 are summarized below. The credit quality rating used is Standard and Poor's, a nationally recognized rating agency.

Investments	Credit Quality Rating	June 30, 2019		June 30, 2018

3. Investments (continued)

B. Investment Interest Rate Risk

The Authority's investment policy limits investment maturities as a means of managing its exposure to fair value losses arising from increasing interest rates. Investments are generally limited to five years maturity, or less. The Authority's Finance Committee must approve investments maturing over five years for the EIA. Maturities of investments held at June 30, 2019 consist of the following:

	Fair Value	Less than 1 Year	One to Five Years	Time to Maturity
U.S. Agencies	\$ 160,254,427	\$ 32,773,839	\$ 127,480,588	10.11
Asset Backed Securities	36,597,227	15,754	36,581,473	2.83
Corporate Mid Term Notes	128,948,396	11,898,833	117,049,564	12.17

	\$ 591,674,149	\$ 55,304,622	\$ 536,369,527	2.67

*Excludes Exchange Traded Funds (ETF) which has a maturity more than 5 years

The Authority recognizes all investments at fair value in accordance with GASB Statement 31 and GASB Statement 72. Fair value equals estimated market values obtained from the Interactive Data Corporation (IDC) pricing system, a leading provider of financial information to global markets. The calculation of realized gains and losses is independent of the calculation of the change in the fair value of investments. Realized gains and losses of the current period

CSAC EXCESS INSURANCE AUTHORITY
NOTES TO THE FINANCIAL STATEMENTS
FOR THE FISCAL YEARS ENDED JUNE 30, 2019 AND 2018

3. Investments (continued)

B. Investment Interest Rate Risk (continued)

include unrealized amounts from prior periods. Investment income includes \$21.1M of unrealized gain for the year ended June 30, 2019. In the year ended June 30, 2018, \$7.2M of unrealized loss was recognized.

The calculation of unrealized gains and losses are shown in the following tables:

	June 30, 2019	June 30, 2018	June 30, 2017
Fair Value at June 30,	\$ 642,361,039	\$ 651,628,827	\$ 616,992,551

3. Investments (continued)

C. Concentration of Credit Risk

The EIA's investment policy places limits on the amount that may be invested in any one issuer. The limits are applied at the time the investment decision is made. These limits are summarized as follows:

	Limit per Institution	Limit per type of Investment
Treasury Notes and Bills	100%	100%
U.S. Agencies	25%	100%
Asset/Mort. Backed/CMOs	5%	20%
Commercial Paper	5%	25%
Bankers' Acceptances	5%	40%
Corporate Medium Term Notes	5%	30%
Federally Insured Time Deposits	5%	20%
Collateralized Time Deposit	5%	20%
Negotiable Certificates of Deposit	5%	30%
Supranationals	10%	30%
Mutual Fund	10%	20%
Mutual Money Market Fund	20%	20%
Municipal Bonds	varies by state	30%
Repurchase Agreements	100%	100% (A) -

(A) Repurchase Agreements must be collateralized with securities authorized by California Government Code, maintained at a level of at least 102% of the market value of the Repurchase Agreement. Maximum maturity may not exceed one year.

The EIO's investment policy places long-term asset allocation targets stated below:

	<u>EIO Target</u>
Equities	0% - 50%
Fixed Income	50% - 100%

1. The equity allocation limitation are specific to the surplus funds of the Captive.
2. The asset manager will be responsible for determining the asset allocation within the targets and rebalance as necessary.
3. The Fixed Income allocation includes the liquidity portion to meet short-term cash flow requirements. The liquidity portfolio will maintain cash and cash equivalents of \$250,000 as required by the Utah Insurance Department regulations.
4. It is further noted the maximum amount of equity exposure, at time of purchase, will be limited to 40% of the aggregated surplus of the CSAC EIA and the EIO.

The investments in the EIO portfolio as of June 30, 2019 conform to these guidelines.

Investments with one institution that represent 5% or more of the total investment portfolio are listed below. Investments issued or explicitly guaranteed by the U.S. government and investments with the State of California's Local Agency Investment Fund (LAIF) have been excluded.

3. Investments (continued)

C. Concentration of Credit Risk (continued)

Issuer	Number of Securities	Fair Value	Percentage of Total Portfolio
Federal National Mortgage Assn	15	\$ 75,312,868	11.7%
Federal Home Loan Bank	14	\$ 64,319,308	10.0%

D. Fair Value Measurements

The framework for measuring fair value provides a fair value hierarchy that categorizes the inputs to valuation techniques used to measure fair value into three levels. The fair value hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy are described as follows:

- Level 1 Inputs to the valuation methodology are quoted prices (unadjusted) for identical assets or liabilities in active markets that a government can access at the measurement date.
- Level 2 Inputs to the valuation methodology include inputs – other than quoted prices included within level 1 – that are observable for an asset or liability, either directly or indirectly.
- Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within a fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value.

U.S. Agency Bonds, U.S. Treasury Notes, Asset Backed Securities, Corporate Mid-Term Notes, Municipal Bonds, Supranationals, Foreign Corporate Notes and Commercial Paper are valued using Level 2 inputs. International equity, International real estate, Negotiable CD's, Large-Cap equity, Mid-Cap equity, Real Estate, Emerging market equity, Small-Cap U.S. equity, and Mortgage Pass Thru are valued using Level 1 inputs.

Level 2 investments are evaluated on market-based measurements that are processed through a rules based pricing application and represent our good faith determination as to what the holder may receive in an orderly transaction (for an institutional round lot position typically \$1M or greater current value U.S. Dollar or local currency equivalent) under current market conditions.

The following table sets forth by level, within the fair value hierarchy, the Authority's assets at fair value as of June 30, 2019.

3. Investments (continued)

E. California's Local Agency Investment Fund (LAIF)

The Authority may also invest in the State of California's LAIF, administered by the State Treasurer. California law restricts the Treasurer to investments in the following categories: U.S. Government securities, securities of federally sponsored agencies, domestic corporate bonds, interest bearing time deposits in California banks and savings and loan associations, prime-rated commercial paper, repurchase and reverse repurchase agreements, security loans, bankers acceptances, negotiable certificates of deposit, supranational debentures, and loans to various bond funds. State of California LAIF investments are audited annually by the Pooled Money Investment Board and the State Controller's Office. Copies of this audit may be obtained from the State Treasurer's Office at 915 Capitol Mall C-15, Sacramento, California 95814.

The total amortized cost of Pooled Money Investment Account at June 30, 2019, was \$105.6B. The fair value is estimated at \$105.8B or 1.001711790 of cost. The average maturity of LAIF investments is 173 days at June 30, 2019.

The Authority's balance in LAIF at June 30, 2019, was \$47.4M and was recognized at LAIF's cost. State of California LAIF's cost approximates the fair value of the Authority's shares. The Authority's balance in LAIF at June 30, 2018, was \$9.1M, and was also valued at LAIF's cost. State of California LAIF is not rated by the investment rating firms.

4. Claim Liabilities

The Authority establishes claim liabilities based on estimates of the ultimate cost of claims (including claims adjustment expenses) that have been reported but not settled, and of claims that were incurred but not reported. Because actual claim cost depends on such complex factors as inflation, changes in doctrines of legal liability, and damage awards, the process used in computing claim liabilities does not necessarily result in an exact amount. Claim liabilities are recomputed periodically using a variety of actuarial and statistical techniques. Claim liability estimates reflect recent settlements, claims frequency, and other economic and social factors. A provision for inflation in the calculation of estimated future claims cost is implicit in the calculation because reliance is placed both on actual historic data that reflects past inflation, and on other factors that are considered to be approximate modifiers of past experience. Adjustments to claim liabilities are charged, or credited, to expense in the period in which they are made.

The governing committees have elected to establish claim liabilities in some programs at a level which includes investment income on monies set aside to pay claims, that is, on a discounted basis. Total claim liabilities at June 30, 2019 of \$681.8M, have been presented at the net present value of \$538.4M. At June 30, 2018, claim liabilities of \$831.8M are presented at their present value of \$664.5M, discounted based on the estimated investment income yield.

Annually, the Board and committees evaluate the discount rate to be used for pool funding and for the actuarial valuation of claim liabilities. This is of particular importance for the EWC Program, the GL1 Program, and the Medical Malpractice Program, because claim liabilities are paid off over a longer period of time. The rates in each program will vary because of the claims payout pattern.

CSAC EXCESS INSURANCE AUTHORITY
NOTES TO THE FINANCIAL STATEMENTS
FOR THE FISCAL YEARS ENDED JUNE 30, 2019 AND 2018

4. Claim Liabilities (continued)

The EWC Program has an extremely long payout period due to the nature of the claims. This is an "excess" program, meaning coverage sits on top of a member's self-insured retention, which can vary from \$125k up to \$5M. Much of the liability arises as a result of a future medical award, or disability award, that extends for the life of the injured worker, who may collect benefits for over 30 years. The total funds available to pay those claims earn interest for years, and because of the size of the program, a change in the discount rate results in a change in the liability of millions. The following chart shows the sensitivity of claim liabilities to the discount rate selected and the resulting effect on net position.

Discount Effect on Claim Liabilities in the EWC Program			
Discount Rate Selected	3.00%	2.00%	1.00%
Claim Liabilities	\$229,358,605	\$252,812,438	\$284,187,400
Net Position Balance	\$57,780,895	\$34,327,062	\$2,952,100

In the PWC Program, the Authority only retains the first \$10k of liability for the years 2009/10 to 2018/19. Since this is paid relatively quickly, the claims for these years are not discounted. Starting 2016/17 program year, corridors in \$10k-\$125k layer adding up to \$31.1M for 2016/17, 2017/18, and 2018/19 years was transferred to the Captive. Additionally, in fiscal year 2016/17, the Authority commuted or bought back the claim liabilities for the 1997-2004 years of \$9.8M, which was the balance of the aggregate stop loss coverage. The Authority transferred this risk to the Captive. Over and above the stop loss coverage, the Authority estimates a claim liability of \$8.2M, which is retained by the EIA and discounted at 1.5% to \$6.7M. The claims for the period 2004/05 to 2008/09 are fully insured.

The discount rate for each program is as follows:

<u>Program</u>	<u>Discount rate</u>
Primary Workers' Compensation	0% 2009/10 forward
Primary Workers' Compensation	1.5% 2003/04 and prior
Primary Workers' Compensation ULAE	1.50%
Excess Workers' Compensation	3.00%
General Liability 1	1.75%
General Liability 2	no discount
Property	no discount
Medical Malpractice	1.75%
Dental	no discount

A summary of the claim liabilities by program is as follows:

	June 30, 2019	June 30, 2018
Primary Workers' Compensation	\$ 59,558,873	\$ 63,276,229
Excess Workers' Compensation	229,358,605	282,695,641
Primary General Liability	-	63,221
General Liability 1	6,162,305	150,183,672
General Liability 2	1,394,812	1,569,647
Property	415,369	40,840
Medical Malpractice	24,563,581	31,956,007

Total Claim Liabilities	<u>\$ 538,405,622</u>	<u>\$ 664,459,654</u>

A. Primary Workers' Compensation

The PWC Program was established on July 1, 1997. The PWC Program is a full service program including claims administration. The Program blends pooling of workers' compensation claims with purchasing of insurance. The Program covers workers' compensation claims up to \$125k, per occurrence. Claims in excess of \$125k are the responsibility of the Authority's EWC Program. In March 2010, the Authority completed a LPT with ACE Insurance Company for the claim liabilities for the July 2004 through June 2009 years. The Authority will continue to administer the claims and is responsible for the ULAE on a go forward basis for those claim years, but ACE is responsible for all claim payments. In August 2016, we commuted or bought back the claim liabilities for the 1997 to 2004 years of \$9.8M, which was the balance of the aggregate stop loss coverage. We transferred this risk to the Captive. The Authority has purchased insurance for claim liabilities in excess of \$10k (per claim) up to \$125k since 2009/10. For the 2010/11 and 2011/12 years, the coverage was with CastlePoint National Insurance Company, which has been placed in conservatorship. Any amounts not covered by CastlePoint are to be covered by the CIGA. Although CIGA has paid on some claims, it has issued denials if other insurance is

4. Claim Liabilities (continued)

A. Primary Workers' Compensation (continued)

available to cover the exposure. The total exposure to the PWC Program that is considered unrecoverable as of June 30, 2019, is approximately \$900K, discounted, and this amount is included in claim liabilities in the PWC Program.

Starting in the 2016/17 policy year, the coverage for the \$115k XS of \$10k layer was purchased subject to a corridor retention. The insurance policies included a corridor retention of \$4.3M for 10 months from July 2016 to April 2017 from AmTrust Group and another corridor retention of \$12.6M for 14 months from May 2017 to June 2018 from ACE/Chubb. These corridor risks were transferred to the EIO. The pro-rated corridor of \$1.7M for two months, May and June 2017, was transferred to the EIO in fiscal year 2016/17. The pro-rated corridor transferred to EIO for 2017/18 was \$10.9M and in 2018/19 a corridor of \$14.3M was transferred to EIO. The Program has a liability for total claims and ULAE of \$59.6M out of which \$40.2M are ULAE liabilities.

Primary Workers' Compensation

Statutory — Excess Workers' Compensation Program

* The Corridor Retention will be adjusted at the end of the year.

FOR THE FISCAL YEARS ENDED JUNE 30, 2019 AND 2018**

4. Claim Liabilities (continued)

B. Excess Workers' Compensation

The EIA established the Excess Workers' Compensation Program in 1979. The Program covers losses excess of member self-insured retentions with pooled risk, reinsurance, and excess insurance. The EWC pool has retained responsibility for the payment of workers' compensation claims in excess of each members' SIR to the pool limit, which has varied by program year, as illustrated in the table below. Since 2008, the EWC program pool has provided coverage from the individual SIR to \$5M, in some years reinsuring all or parts of the pooled layer. The program reinsured 80% of the SIR to \$1M layer with Castle Point during the program years 2010/11-2011/12. In August 2016, the California Insurance Commissioner placed Castlepoint Insurance Companies (Castlepoint) into conservatorship/liquidation. CIGA has issued denials if other insurance is available to cover the exposure. The additional exposure to the EWC Program that is considered unrecoverable is of June 30, 2019, is approximately \$3.9M, discounted, and this amount is included in claim liabilities and considered unrecoverable.

Members' SIRs vary between \$125k and \$5M and are approved by the Underwriting Committee. The Authority's coverage responsibility has varied from 1979 to present, as follows:

Coverage Period	Pool Layer
November 1, 1979 to October 5, 1993	SIR to \$500k
October 6, 1993 to December 31, 1994	SIR to \$750k
January 1, 1995 to June 30, 2002	SIR to \$300k
July 1, 2002 to June 30, 2008	SIR to \$5M
July 1, 2008 to June 30, 2010	SIR to \$5M: Reinsured SIR to \$1M 30%-EIA; 70% - American Safety Casualty Insurance Company. 100% EIA pool \$1M - \$5M.
July 1, 2010 to June 30, 2011	SIR to \$5M: Reinsured SIR to \$1M - 20%-EIA; 80% - CastlePoint National Insurance Company. \$1M - \$5M Retained by EIA pool.
July 1, 2011 to June 30, 2012	Pool SIR to \$5M: Reinsured SIR to \$1M - 20%-EIA; 80% - CastlePoint National Insurance Company. \$1M - \$5M Layer: Reinsured by Wesco Insurance Company, \$3.5M Aggregate Corridor deductible retained by EIA.
July 1, 2012 to June 30, 2013	SIR to \$5M: \$23.8M aggregate deductible in the SIR to \$1M layer and \$4.1M aggregate deductible in the \$1M to \$5M layer, both layers reinsured with Wesco Insurance.
July 1, 2013 to June 30, 2014	SIR to \$5M Pool: Reinsured with Wesco Insurance Company, subject to a \$19.9M aggregate corridor deductible.
July 1, 2014 to June 30, 2015	Core Tower SIR to \$5M - Reinsured with Wesco Insurance Co. \$23.5M aggregate deductible in the SIR to \$5M layer. Educational Tower (SIR to \$2.5M) effective 1/1/15 - \$8.6M aggregate corridor deductible.
July 1, 2015 to June 30, 2016	Core Tower SIR to \$5M - \$24.9M aggregate deductible in the SIR to \$5M layer. Educational Tower \$6.1M aggregate corridor deductible.
July 1, 2016 to June 30, 2017	Core Tower SIR to \$5M - Reinsured with Wesco Insurance Co (AmTrust) subject to \$22.1M aggregate corridor deductible transferred to the EIO. Educational Tower SIR to \$2.5M: \$10.4M aggregate corridor transferred to the EIO. \$0-\$125k CSU primary layer subject to \$17.3M corridor deductible.
July 1, 2017 to June 30, 2018	SIR to \$5M: Core Tower & Educational Tower - Reinsured with Great American subject to a combined \$44.8M aggregate transferred to the EIO. Educational Tower- corridor for the primary layer of \$16.4M transferred to the EIO. \$0-\$125k CSU primary layer subject to \$16.8M corridor deductible.
July 1, 2018 to June 30, 2019	SIR to \$5M: Core Tower & Educational Tower - Reinsured with Great American, subject to a combined \$47.6M aggregate corridor deductible transferred to the EIO. Educational Tower CSU primary layer - corridor for the primary layer of \$7M transferred to the EIO.

4. Claim Liabilities (continued)

B. Excess Workers' Compensation (continued)

The Board has established a target equity (net position) range to ensure the financial stability of the program. That range was \$34M - \$83M for the 2018/19 fiscal year. To keep the program's net position within that range, the Underwriting Committee has recommended several strategies, which the EIA Board has adopted, to address the risk of adverse loss development. First, beginning in 2008/09, the EIA has purchased reinsurance to cover or reduce the EWC pool exposure in the SIR to \$5M layer. Second, the EWC program consistently funds future claims at a confidence level higher than the expected confidence level and has charged members at that rate, rather than the (lower) rate of actual insurance costs. As noted in the table above, the program retained an aggregate deductible (known as a corridor retention) as part of the reinsurance agreement in fiscal year 2012/13 forward. Since 2016/17, the corridor retentions have been transferred to the EIA's captive insurance company to allow the program to gain greater investment returns on the premiums to fund the corridor. The discount from the additional earnings was passed on to program members as premium savings.

Excess Workers' Compensation

* The Corridor Retention will be adjusted at the end of the year. The Core and Educational Towers are subject to a single, shared corridor retention of \$47,765,027 (does not include primary <\$125k layer).

** The Corridor Retention will be adjusted at the end of the year.

CSAC EXCESS INSURANCE AUTHORITY
NOTES TO THE FINANCIAL STATEMENTS
FOR THE FISCAL YEARS ENDED JUNE 30, 2019 AND 2018

4. Claim Liabilities (continued)

C. General Liability 1

The Authority's GL1 Program began pooling risk on July 1, 1985. The GL1 Program combines risk retention, risk pooling, and the purchase of excess reinsurance. Starting with the 2018/19 year the Primary General Liability (PGL) Program merged into the GL1 Program to create the Deductible Buy Down (DBD) Option. Members within this option have a \$10k deductible per claim, with claim costs above their deductible and below the \$100k limit being the responsibility of the GL1 Program and reinsured by Berkley Insurance Company. Claims are not discounted in this option. For 2017/18, when the Option was considered the PGL Program, a corridor of \$500k was transferred to the EIO. In 2018/19, the corridor increased to \$1.1M and was also transferred to the EIO.

For the rest of the GL1 Program, each member maintains a SIR between \$25k and \$1M. In the 2016/17 and 2017/18 fiscal years, the pool retained the responsibility for claims in excess of each member's SIR up to \$5M and purchased reinsurance from \$5M up to \$25M. With the first reinsurance layer (from \$5M to \$10M), the Program is responsible for the first \$7.5M in claims (should they occur) over the 3-year period encompassing the 2015/16 to 2017/18 fiscal years. This risk is transferred to the Captive. Claim liabilities are recognized based on the actuarial estimate of the expected ultimate claim cost, discounted at 1.75%. Reinsurance has been purchased for claims in excess of the pool limits. Additional coverage can be added by purchasing optional excess liability insurance, which is available as part of the Miscellaneous Programs. Effective April 1, 2019, EIA entered into a Loss Portfolio Transfer (LPT) transaction with MultiStrat Re (MS Re). This arrangement transfers the Program's liabilities to a reinsurer, MultiStrat Re, going back to July 1, 2007, thereby stabilizing the program's funding position, and also providing coverage for liabilities over the next 5 years (through June 30, 2024). (See note 5 for MSRe LPT details)

NOTES TO THE FINANCIAL STATEMENTS
FOR THE FISCAL YEARS ENDED JUNE 30, 2019 AND 2018**

4. Claim Liabilities (continued)

D. General Liability 2

The GL2 Program was designed to meet the liability insurance needs of the larger members and began on February 15, 1991. In this Program, members are responsible for their SIRs ranging from \$1M to \$5M and their Individual Member Corridor Deductibles (IMCD) ranging from \$250k to \$2.5M. Since 2014/15, the Program has utilized a pool funded corridor retention within the SIR to \$10M layer, which was \$18M for 2017/18, and \$24.5M in the 2018/19 year. Starting with the 2016/17 program year, these corridors have been transferred to the Captive.

The chart below shows the current structure of the Program.

General Liability 2

\$25M	Reinsurance Layer Quota Share Placement 67% AmTrust Syndicate 33% Hiscox Syndicate \$5M excess of \$20M
\$20M	Reinsurance Layer Quota Share Placement 35% Markel Global Reinsurance Co. 30% Great American 20% Brit Insurance 15% HISCOX \$10M excess of \$10M
\$10M	Reinsurance Layer QBE and CHUBB Subject to a \$24,500,000 Corridor Retention Reinsured by EIO

* r 2 GL2 Program members purchase additional limits through the Optional Excess Liability Program.

**Individual Member Corridor Deductible (IMCD) where applicable.

NOTES TO THE FINANCIAL STATEMENTS
FOR THE FISCAL YEARS ENDED JUNE 30, 2019 AND 2018**

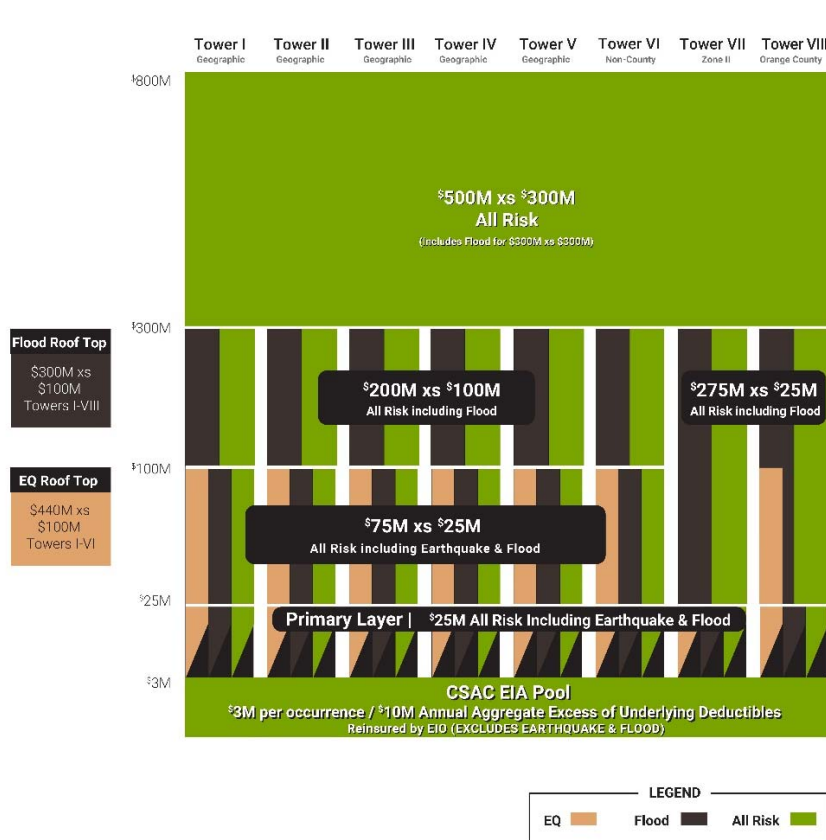

4. Claim Liabilities (continued)

E. Property

The Authority's Property Program was established to allow members to group purchase primary and excess property insurance. The coverage provides all risk, flood, boiler and machinery, and earthquake limits. The Program is separated into 8 Towers, as shown in the chart below. These Towers serve to diversify geographic risk within the Program. Members are responsible for all risk deductibles ranging from \$5k to \$100k. Deductibles may vary for specified exposures. In 2017/18, the earthquake deductible was bought down to 2% of the insured value, with a deductible cap of \$100M. The pool assumes the risk for the difference between the member's deductible and the insurance deductible. Optional coverage is available for contractor's equipment, auto physical damage, and fine arts.

The primary layer of the Program is reinsured with Lexington and has been pre-paid through 2020/21. Members are billed each July for the coverage period of April 1st to March 31st. The primary insurance policy has pool limits of \$3M per occurrence and \$10M annual aggregate. Additionally, the pool buys down member auto physical damage deductibles by paying the difference between the member deductible of \$10k and \$20k, up to an annual aggregate total of \$400k. The pool risk was transferred to the Captive in the 2016/17 through 2018/19 years. Beginning in 2014, the Authority began funding a catastrophic flood pool to fund the program earthquake and flood deductibles. In the 2018/19 year, members were charged \$2.5M (\$1M for flood risk and \$1.5M for earthquake risk) to fund the pool. As of June 30, 2019, the Authority has partially funded the \$30M goal for the catastrophic risk pool, with \$19.5M total funds in the pool.

Excess of the EIA deductible and the Lexington's \$25M all-risk primary layer, various layers of insurance provide coverage for flood, earthquake, and other exposures. The program maintains total all risk limits of \$800M, EQ limits of \$540M, and \$600M in flood limits.

NOTES TO THE FINANCIAL STATEMENTS
FOR THE FISCAL YEARS ENDED JUNE 30, 2019 AND 2018**

4. Claim Liabilities (continued)

F. Medical Malpractice

The Medical Malpractice Program was established on June 1, 1988, to provide medical malpractice, general liability, and blanket contract health coverage to public health facilities. The Program provides coverage to members with exposures ranging from large acute care hospitals to small public and mental health clinics. The Medical Malpractice Program combines risk retention, risk pooling, and the purchase of reinsurance insurance. The pooled layer is \$1.5M in excess of each member's deductible or retention and \$20M of reinsurance is purchased in excess of the pooled layer.

The Program is divided into two groups for underwriting purposes – Program 1 for larger members with SIRs, and Program 2 for smaller members with deductibles. Medical Malpractice Program 1 members have a range of self-insured retentions from \$500k to \$1.1M. Medical Malpractice Program 2 members can elect deductibles from \$5k to \$10k.

The Program structure is illustrated in the following chart:

Medical Malpractice

NOTES TO THE FINANCIAL STATEMENTS
FOR THE FISCAL YEARS ENDED JUNE 30, 2019 AND 2018**

4. Claim Liabilities (continued)

G. Dental

In the pooled Dental plan, claim liabilities are very predictable based on capped benefits. The claim liabilities at June 30, 2019 and June 30, 2018 of \$1.9M and \$1.8M, respectively, are undiscounted and are considered short term.

H. EIO

Total claim liabilities of the EIO June 30, 2019 of \$247.3M have been presented at the net present value of \$215M using a 3.45% discount rate. On June 30, 2018 of \$148.6M have been presented at the net present value of \$132.8M using 3.75% Discount rate.

5. GL1 Los Portfolio Transfer (LPT)

The General Liability 1 (GL1) Program faced its own challenges due to a sudden increase in loss development from calendar year 2018. In response to the adverse loss development and the deterioration of the Program's net position, the EIA Board approved a Loss Portfolio Transfer (LPT) deal. The transaction, effective April 1, 2019, transfers the Program's liabilities to a reinsurer, MultiStrat Re (MS Re), going back to July 1, 2007, thereby stabilizing the program's funding position, and also providing coverage for liabilities over the next 5 years (through June 30, 2024).

A. Structure of the LPT

The program splits the estimated claim payments for the entire coverage period of July 1, 2007 to June 30, 2024 into various layers, with MS Re being responsible for some layers while EIA is responsible for others. Per actuarial calculations, although it is expected that ultimately the total payments will be \$488.2M for the entire period, much of the payment total will be made on claims incurred in future program years (2019-20 to 2023-24). Only \$170.6M (discounted) of the payments are associated with claims incurred in the 2007-08 to 2018-19 years (LPT years). The discounted value of claims of \$3.4M in EIA experience account are included in the EIA claims liabilities as of June 30, 2019. The corresponding premium expense for those claim payments is \$139M, out of which \$100.6M was payable to MS Re and \$38.5M was payable to the EIO for the corridor that was transferred as explained below. Additionally, a rate credit of \$16.7M is recorded as an offset to the premium expense.

Breakdown of the layers is as follows:

Layer	Layer Limit	Expected Payments as of June 30, 2019
MsRe Reinsurance 1	\$ 170,631,620	\$ 170,631,620
EIA Corridor 1 *	291,400,000	291,400,000
EIA Experience Account	15,000,000	15,000,000
MsRe Reinsurance 2	17,500,000	11,149,508
EIA Corridor 2	Unlimited	-
Total (excluding EIA Corridor 2)	\$ 494,531,620	\$ 488,181,128

* EIA Corridor 1 has been transferred to the EIO.

CSAC EXCESS INSURANCE AUTHORITY
NOTES TO THE FINANCIAL STATEMENTS
FOR THE FISCAL YEARS ENDED JUNE 30, 2019 AND 2018

5. GL1 Loss Portfolio Transfer (LPT) (continued)

A. Structure of the LPT (continued)

Per the deal, MS Re will cover first \$170.6M in the claim payments, after which EIA Corridor 1 will cover the next \$291.4M. This corridor is transferred to the EIO for a premium of \$38.5M for all claims from July 1, 2007 to June 30, 2019. More corridors will be transferred for this layer as we progress thru the years. Next is the EIA experience account that is funded by the Premium Rate Credit as explained below. The discounted value of claims of \$3.4M in EIA experience account are included in the EIA claims liabilities as of June 30, 2019. Once the EIA experience account is exhausted, MS Re will cover the next \$17.5M in claim payments after which the EIA corridor 2 kicks in with unlimited liability. Although it is expected that ultimately the total payments will be \$488.2 million, these numbers will be recalculated annually based on actual payments and recent claims developments.

The total cash premium of \$191.5M in exchange of the liabilities transferred is recorded as payable to MS Re as of June 30, 2019. Only \$100.6M of this amount is related to claims from July 1, 2007 to June 30, 2019. Therefore, a corresponding prepaid asset of \$90.9M is recognized at June 30, 2019. Additionally, \$38.5M is recorded payable to the EIO (and eliminated upon consolidation with EIA) for discounted value of EIA corridor 1 liabilities at June 30, 2019.

For the LPT experience account, MS Re has agreed to fund this layer thru Premium Rate Credits. They will pay the EIA a rate credit of .0165158% per month, compounded, on the monthly balance of premium paid less claim payments plus any rate credits not withdrawn by the EIA. Accordingly, the EIA has recorded a receivable of \$16.7M that is the present value of this rate credit as of June 30, 2019. Correspondingly, the same amount is recorded as a reduction to premium as of June 30, 2019.

As a result of the transfer of the Loss Portfolio, GL1 Program reduced its net claim liabilities and corresponding claim expense by \$167.2M for a net premium of \$122.4M and broker fees of \$1.5M, thereby increasing the GL1 Net Position by \$43.3M as a result of this transaction

6. Capital Assets

Capital assets include land, buildings, tenant improvements, furniture, equipment, and software assets with an initial, individual cost of more than \$5k and an estimated useful life in excess of one year. A capital asset summary of the land, buildings, and equipment is presented below:

	June 30, 2017	Additions/ Deductions	June 30, 2018	Additions/ Deductions	June 30, 2019
Land	\$ 1,000,000	\$ -	\$ 1,000,000	\$ -	\$ 1,000,000
Depreciable Assets:					
Buildings and Tenant Improvements	8,100,091	17,500	8,117,591	(9,865)	8,107,726
Furniture and Equipment	1,381,529	156,890	1,538,419	(261,622)	1,276,797
Software	3,716,044	1,122,080	4,838,124	267,709	5,105,833
Total Depreciable Assets	13,197,664	1,296,470	14,494,134	(3,778)	14,490,356
Less Accumulated Depreciation	(4,359,424)	(929,668)	(5,289,092)	(129,143)	(5,418,235)
Net Depreciable Assets	8,838,240	366,802	9,205,042	(132,921)	9,072,121
Net Land, Buildings and Equipment	\$ 9,838,240	\$ 366,802	\$ 10,205,042	\$ (132,921)	\$ 10,072,121

**CSAC EXCESS INSURANCE AUTHORITY
NOTES TO THE FINANCIAL STATEMENTS
FOR THE FISCAL YEARS ENDED JUNE 30, 2019 AND 2018**

6. Capital Assets (continued)

Depreciation of furniture, equipment, and software is reported as an operating expense in the General Administration fund. Depreciation for the building and tenant improvements is reported in the Building fund. Total accumulated depreciation is reported as follows:

Accumulated Depreciation Detail	Balance at June 30, 2017	Additions/ Deductions	Balance at June 30, 2018	Additions/ Deductions	Balance at June 30, 2019
Buildings and Tenant Improvements	\$ (1,993,824)	\$ (265,092)	\$ (2,258,916)	\$ (263,417)	\$ (2,522,333)
Furniture and Equipment	(1,170,245)	(58,813)	(1,229,058)	498,807	(730,251)
Software	(1,195,355)	(605,763)	(1,801,118)	(364,533)	(2,165,651)
Total	<u>\$ (4,359,424)</u>	<u>\$ (929,668)</u>	<u>\$ (5,289,092)</u>	<u>\$ (129,143)</u>	<u>\$ (5,418,235)</u>

Depreciation is calculated using the straight-line method. The useful life for major classes of capital assets range from 60 years for the building, 10-25 years for tenant improvements of the EIA, over the lease terms of 5-10 years for leased tenant improvements, and 3-7 years for furniture, equipment, and software.

7. Operating Leases

The Authority has leased 84% of the first floor of its two story building at 75 Iron Point Circle. The Authority occupies the entire second floor. Leases with various commercial tenants have been executed for periods of 5 to 10 years, with one lease having additional options to extend, but none exceeding 10 years. The cost of tenant improvements for the space under lease is \$844k with accumulated depreciation of \$770k. The cost of the building and improvements under lease is \$3.3M with accumulated depreciation of \$1.2M. The following is the schedule of lease revenue receivable under these operating leases for the next five years:

2020	\$	438,144
2021		269,831
2022		139,730
2023		143,922
2024		148,239
Total	<u>\$</u>	<u>1,139,866</u>

8. Employee Retirement System

The Authority provides pension benefits to its employees through the 2% at age 55 Miscellaneous Plan, a cost-sharing, multiple-employer defined benefit pension plan (Classic) maintained by CalPERS, an agency of the State of California. Effective January 1, 2013, new employees not eligible to participate in the 2% at 55 plan, are covered under the new Public Employees' Pension Reform Act Plan (PEPRA), which has a different benefit structure of 2% at age 62 and other differences. CalPERS acts as a common investment and administrative agent for participating public entities within the State of California.

Collectively, the Classic Plan and the PEPRA Plan are referred to as the Plans. CalPERS issues a publicly available financial report that includes financial statements and required supplementary information for the Plans. This report is available at the CalPERS' website: www.calpers.ca.gov under Forms and Publications

**CSAC EXCESS INSURANCE AUTHORITY
NOTES TO THE FINANCIAL STATEMENTS
FOR THE FISCAL YEARS ENDED JUNE 30, 2019 AND 2018**

8. Employee Retirement System (continued)

A. General Information about the Pension Plan

Benefits Provided

The benefits for the Plans are established by contract with CalPERS, in accordance with the provisions of the California Public Employees' Retirement Law (PERL). The benefits are based on members' years of service, age, final compensation, and benefit formula. Benefits are provided for disability, death, and survivors of eligible members or beneficiaries. To be eligible for service retirement, members must be at least 50 and a minimum of five years of CalPERS-credited services. Members joining after January 1, 2013 must be at least 52.

Employees covered by the benefit terms

At June 30, 2019, the following employees were covered by the benefit terms:

Active members	79
Inactive members receiving benefits	10
Total	<u>89</u>

Contribution Description

Section 20814(c) of the PERL requires employer contribution rates for all public employers be determined on an annual basis by the actuary and are effective on the July 1st following notice of a change in the rate. The contributions are determined through the CalPERS' annual actuarial valuation process. The Plans' actuarially determined rate is based on the estimated amount necessary to pay the Plans' allocated share of the risk pool's costs of benefits earned by employees during the year, and any unfunded accrued liability. The Authority is required to contribute the difference between the actuarially determined rate and the contribution rate of employees. The Authority's required contribution rate on covered payroll for the measurement period ended June 30, 2018 (the measurement date) was 10.411% and 7.383% of annual pay for the Classic and PEPRAs plans respectively.

For the year ended June 30, 2019, the legally required contributions were \$656,865. The required contribution for the 2018 -19 is recognized as a Deferred Outflow of Resources Related to Pensions since the measurement date of the Authority's pension-related accounts was June 30, 2018.

**CSAC EXCESS INSURANCE AUTHORITY
NOTES TO THE FINANCIAL STATEMENTS
FOR THE FISCAL YEARS ENDED JUNE 30, 2019 AND 2018**

8. Employee Retirement System (continued)

A. General Information about the Pension Plan (continued)

Actuarial Assumptions

For the measurement period ended June 30, 2018 (the measurement date), the Total Pension Liability (TPL) was determined by rolling forward the June 30, 2017 TPL. The June 30, 2018 and June 30, 2017 TPL were based on the following actuarial methods and assumptions:

Actuarial Cost Method	Entry-Age Normal
Actuarial Assumptions:	
Discount Rate	7.15%
Inflation	2.50%
Salary Increases	Varies by Entry Age and Service
Investment Rate of Return	7.15% Gross of Administrative Expenses
Mortality Rate Table (1)	Derived using CalPERS' Membership for all funds
Post Retirement Benefit Increase	Contract COLA up to 2.50% until Purchasing Power Protection Allowance Floor on Purchasing Power applies.

1) The mortality table used was developed based on CalPERS-specific data. The table includes 15 years of mortality improvements using Society of Actuaries Scale 90% of scale MP2016. For more details refer to the December 2017 experience study report (based on CalPERS demographic data from 1997 to 2015) can be found on the CalPERS website.

Changes in Assumptions

In 2018, demographic assumptions and inflation rate were changed in accordance with the CalPERS Experience Study and Review of Actuarial Assumptions December 2017. There were no changes in discount rate.

Discount Rate

The discount rate used to measure the total pension liability for PERF C was 7.15%. The projection of cash flows used to determine the discount rate assumed that contributions from plan members will be made at the current member contribution rates and that contributions from employers will be made at statutorily required rates, actuarially determined. Based on those assumptions, the Plan's fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

Long Term Expected Rate of Return

The long-term expected rate of return on pension plan investments was determined using a building-block method in which expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class.

In determining the long-term expected rate of return, CalPERS took into account both short-term and long-term market return expectations as well as the expected pension fund cash flows. Using historical returns of all of the funds' asset classes, expected compound (geometric) returns were calculated over the short-term (first 10 years) and the long-term (11+ years) using a building-

**CSAC EXCESS INSURANCE AUTHORITY
NOTES TO THE FINANCIAL STATEMENTS
FOR THE FISCAL YEARS ENDED JUNE 30, 2019 AND 2018**

8. Employee Retirement System (continued)

A. General Information about the Pension Plan (continued)

block approach. Using the expected nominal returns for both short-term and long-term, the present value of benefits was calculated for each fund. The expected rate of return was set by calculating the rounded single equivalent expected return that arrived at the same present value of benefits for cash flows as the one calculated using both short-term and long-term returns. The expected rate of return was then set equal to the single equivalent rate calculated above and adjusted to account for assumed administrative expenses.

The table below reflects long-term expected real rate of return by asset class. The rate of return was calculated using the capital market assumptions applied to determine the discount rate and asset allocation. These geometric rates of return are net of administrative expenses.

Asset Class	Current Target Allocation¹	Real Return Years 1 - 10²	Real Return Years 11+³
Global Equity	50.00%	4.80%	5.98%
Global Fixed Income	28.00	1.00	2.62
Inflation Sensitive	0.00	0.77	1.81
Private Equity	8.00	6.30	7.23
Real Estate	13.00	3.75	4.93
Liquidity	1.00	0.00	(0.92)

(1) Fixed income is included in Global Debt Securities; Liquidity is included in Short term investments, Inflation Assets, are included in both Global Equity securers and Global Debt Securities

(2) An expected inflation of 2.0% used for this period

(3) An expected inflation of 2.92% used for this period

Sensitivity of the Authority's Proportional Share of the Net Pension Liability to the Changes in the Discount Rate

The following presents the net pension liability of the plan as of the June 30, 2018 measurement date, calculated using the discount rate of 7.15 percent, as well as what the net pension liability (asset) would be if it were calculated using a discount rate that is 1 percentage-point lower (6.15 percent) or 1 percentage-point higher (8.15 percent) than the current rate:

6/30/2018 Measurement Date	Discount Rate - 1% 6.15%	Current Discount Rate 7.15%	Discount Rate +1% 8.15%
Plan Net Pension Liability	\$ 2,296,415	\$ 1,429,650	\$ 714,150

8. Employee Retirement System (continued)

A. General Information about the Pension Plan (continued)

For the measurement date June 30, 2017, the following presents the net pension liability (asset) of the plan calculated using the discount rate 7.15 percent, as well as what the net pension liability (asset) would be if it were calculated using discount rate that is 1 percentage-point lower (6.15 percent) or 1 percentage-point higher (8.15 percent) than the current rate.

6/30/2017 Measurement Date	Discount Rate - 1% 6.15%	Current Discount Rate 7.15%	Discount Rate +1% 8.15%
Plan Net Pension Liability	\$ 2,499,288	\$ 1,603,286	\$ 861,201

B. Pension Liabilities, Pension Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions

GASB 68 requires that the reported results must pertain to liability and asset information within certain defined timeframes. For this report, the following timeframes are used:

	2018-2019 Fiscal Year	2017-2018 Fiscal Year
Valuation Date	June 30, 2017	June 30, 2016
Measurement Date	June 30, 2018	June 30, 2017
Measurement Period	June 30, 2017 to June 30, 2018	June 30, 2016 to June 30, 2017

At June 30, 2019 the Authority reported a net pension liability (NPL) of \$1,429,650 and \$1,603,286 at June 30, 2018 for its proportionate share of the Miscellaneous Pool's NPL.

The Authority's NPL for the Plan is measured as the proportionate share of the NPL. The NPL of the Plan is measured as of June 30, 2018. The total pension liability (TPL) used to calculate the NPL was determined by an actuarial valuation as of June 30, 2017 rolled forward to June 30, 2018 using standard update procedures. Using the Authority's individual employer rate plan's share of the risk pool TPL and Fiduciary Net Position (FNP), the proportionate shares of the TPL and FNP at the measurement date are determined for the Authority by the actuary. The Authority's proportionate share of the NPL for PERF C as of June 30, 2018 was 0.037935% for the Classic Plan and PEPRA Plan combined. The Authority's proportionate share of the NPL for PERF C and PEPRA combined as of June 30, 2017 was 0.040671%.

9. Other Postemployment Benefits (OPEB)

A. Plan Description

The Authority's defined benefit Other Post Employment Benefit Plan (OPEB), provides OPEB for all permanent full-time employees of the Authority. This is an agent multiple-employer defined benefit OPEB plan administered by the California Employers' Retirement Benefit Trust (CERBT). The Authority's defined benefit postemployment healthcare plan, CSAC Excess Insurance Authority Postemployment Healthcare Plan (CSAC EIA OPEB), provides limited medical benefits for retired employees and their beneficiaries. Retired employees and their beneficiaries must continue their participation in a CalPERS health care program to access CSAC EIA OPEB benefits. The Public Employees' Medical and Hospital Care Act (PEMHCA) of the State of California assigns the authority to establish and amend benefit provisions to the CalPERS Board of Directors.

CalPERS issues a publicly available financial report that includes financial statements and required supplementary information. Copies of CalPERS' annual financial report may be obtained from their executive office, 400 Q Street, Sacramento, California 95814.

The postemployment health care benefit rates per month, per retiree, have been established by the CalPERS Board of Directors, as shown below. Retirees, or their beneficiaries, are responsible for the remaining balance of their monthly health care cost.

Calendar Year 2016	\$125 per month
Calendar Year 2017	\$128 per month
Calendar Year 2018	\$133 per month
Calendar Year 2019	\$136 per month
Calendar Year 2020	\$139 per month
Thereafter	Adjusted per CalPERS Board to reflect changes on the medical care component of the CPI

Under PEMHCA, the Authority is required to contribute toward medical coverage for the retiree's lifetime or until coverage is otherwise discontinued. If a covered spouse survives the retiree and is entitled to survivor pension benefits, the Authority will continue the applicable contribution toward the spouse's coverage until his or her death. CSAC EIA OPEB provides employees who retire directly from the Authority, at a minimum age of 55, with a minimum of 5 years of coverage.

Employees covered by benefit terms. At June 30, 2019, the following employees were covered by the benefit terms:

Active Employees	68
Inactive Employees or beneficiaries receiving benefits	6
Total Participants	<u>74</u>

The long-term expected rate of return on plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of OPEB plan investment expense and inflation) are developed for each major asset class. The Authority's OPEB Plan assets are invested as part of the CalPERS CERBT Strategy 1 portfolio with a 7.28% expected Long term rate of return. Each employer choosing CERBT Strategy 1 owns a percentage of this portfolio. The Authority does not have direct ownership of the securities in the portfolio. The target allocation and best estimates of real rates of return for each major class are summarized below:

**CSAC EXCESS INSURANCE AUTHORITY
NOTES TO THE FINANCIAL STATEMENTS
FOR THE FISCAL YEARS ENDED JUNE 30, 2019 AND 2018**

9. Other Postemployment Benefits (OPEB) (continued)

A. Plan Description (continued)

<u>Asset Class</u>	<u>Target Allocation</u>	<u>Long-Term Expected Real Rate of Return</u>
Global Equity	59%	4.80%
Fixed Income	25%	1.10%
Global Real Estate (REIT)	8%	3.20%
Treasury Inflation Protected Securities (TIPS)	5%	0.25%
Commodities	3%	1.50%

B. Net OPEB Liability

The Authority's net OPEB liability was \$601,102 as of June 30, 2019 and \$823,272 as of June 30, 2018. The total OPEB liability used to calculate the net OPEB liability was determined by an actuarial valuation as of June 30, 2017.

Actuarial assumptions: The total OPEB liability in the July 1, 2017 actuarial valuation was determined using the following actuarial assumptions, applied to all periods included in the measurement, unless otherwise specified:

Valuation Date	June 30, 2017
Measurement Date	June 30, 2018
Funding Method	Entry Age Normal Cost, level percent of pay
Asset Valuation Method	Market value of Assets
Long Term Return on Assets	7.28% as of June 30, 2018, and June 30, 2017 net of plan investment expenses and including inflation
Municipal Bond Rate	Fidelity Municipal Bond AA 20 Year Maturity Yield
Discount Rates	4.69% to develop the Total OPEB Liability as of June 30, 2017 7.28% for explicit liabilities and 3.62% for implicit subsidy liabilities as of June 30, 2018
Inflation	2.75% per year
Salary Increases	3.25% per year; since benefits do not depend on salary, this is used only to allocate the cost of benefits between service years
Participants Valued	Only current active employees and retired participants are covered

**CSAC EXCESS INSURANCE AUTHORITY
NOTES TO THE FINANCIAL STATEMENTS
FOR THE FISCAL YEARS ENDED JUNE 30, 2019 AND 2018**

9. Other Postemployment Benefits (OPEB) (continued)

B. Net OPEB Liability (continued)

Discount Rate is the Interest rate used to discount future potential benefit payments to the valuation date. The discount rate used to measure the total OPEB liability was 7.28% and 3.62% for the explicit and implicit portions respectively. The projection of explicit subsidy benefit cash flows used to determine the discount rate assumed that Authority contributions would be made at rates equal to actuarially determine contribution rates. Based on those assumptions, the OPEB plan's fiduciary net positions were projected to be available to make all projected explicit subsidy OPEB payments for current active and inactive employees and beneficiaries. Therefore, the long term expected rate of return on OPEB plan investments was applied to all periods of projected explicit subsidy benefit payments to determine the total OPEB liability.

Demographic actuarial assumptions used in this valuation are based on the 2014 experience study of the California Public Employees Retirement System using data from 1997 to 2011, except for a different basis used to project future mortality improvements. Mortality rates used were those published by CalPERS, adjusted to back out 20 years of Scale BB to central year 2008. Mortality improvement assumption is based on MacLeod Watt Scale 2017 applied generationally.

The Authority's OPEB Valuation is prepared for a closed group. There were no benefit changes in the Authority's OPEB Plan.

Mortality rates were based on Improvement Bickmore Scale 2017 applied generationally. Healthcare Trend Medical plan premiums and claims costs by age are assumed to increase once each year. Increases over the prior year's levels are assumed to be effective on the dates shown below:

<u>January 1</u>	<u>Increases</u>	<u>January 1</u>	<u>Increases</u>
2019	8.00%	2022	6.00%
2020	7.50%	2023	5.50%
2021	7.00%	2024	5.00%
2022	6.50%	2025 & Later	5.00%

9. Other Postemployment Benefits (OPEB) (continued)

D. OPEB Expense and Deferred Outflow and Inflow of Resources Related to OPEB

For the year ended June 30, 2019, the Authority recognized OPEB expense of \$164,158. At June 30, 2019, the Authority reported deferred outflows of resources and deferred inflows of resources related to OPEB from the following sources:

	Deferred Outflow of Resources		Deferred Inflow of Resources		Total	
	Explicit	Implicit	Explicit	Implicit	Deferred Outflow of Resources	Deferred Inflow of Resources
Changes of assumptions	\$ -	\$ 74,610	\$ 427,887	\$ 33,527	\$ -	\$ 386,804
Net Difference between projected and actual earnings on investments	-	-	22,755	-	-	22,755
Contributions made subsequent to the measurement date	20,366	13,217	-	-	33,583	-
	<u>\$ 20,366</u>	<u>\$ 87,827</u>	<u>\$ 450,642</u>	<u>\$ 33,527</u>	<u>\$ 33,583</u>	<u>\$ 409,559</u>

The \$33,583 reported as deferred outflows of resources related to contributions subsequent to the measurement date will be recognized as a reduction of the net OPEB liability during the fiscal year ending June 30, 2020.

The other amounts reported as deferred outflows of resources and deferred inflows of resources related to OPEB will be recognized in OPEB expense as follows:

For the Fiscal Year Ending June 30	Recognized Net Deferred Outflows (Inflows) of Resources	Recognized Net Deferred Outflows (Inflows) of Resources (Implicit)	Total
2020	\$ (55,100)	\$ 4,006	\$ (51,094)
2021	(55,100)	4,006	(51,094)
2022	(55,100)	4,006	(51,094)
2023	(47,654)	4,006	(43,648)
2024	(47,550)	4,006	(43,544)
Thereafter	(190,137)	21,053	(169,084)

For the year ended June 30, 2018, the Authority recognized OPEB expense of \$226,344. At June 30, 2018, the Authority reported deferred outflows of resources and deferred inflows of resources related to OPEB from the following sources:

	Deferred Outflow of Resources		Deferred Inflow of Resources		Total	
	Explicit	Implicit	Explicit	Implicit	Deferred Outflow of Resources	Deferred Inflow of Resources
Changes of assumptions	\$ -	\$ -	\$ 106,006	\$ 37,597	\$ -	\$ 143,603
Net Difference between projected and actual earnings on investments	-	29,793	-	-	-	29,793
Contributions made subsequent to the measurement date	144,990	-	5,175	-	150,165	-
	<u>\$ 144,990</u>	<u>\$ 29,793</u>	<u>\$ 111,181</u>	<u>\$ 37,597</u>	<u>\$ 150,165</u>	<u>\$ 173,396</u>

The \$150,165 reported as deferred outflows of resources related to contributions subsequent to the measurement date will be recognized as a reduction of the net OPEB liability during the fiscal year ending June 30, 2019.

**CSAC EXCESS INSURANCE AUTHORITY
NOTES TO THE FINANCIAL STATEMENTS
FOR THE FISCAL YEARS ENDED JUNE 30, 2019 AND 2018**

9. Other Postemployment Benefits (OPEB) (continued)

D. OPEB Expense and Deferred Outflow and Inflow of Resources Related to OPEB (continued)

The other amounts reported as deferred outflows of resources and deferred inflows of resources related to OPEB will be recognized in OPEB expense as follows:

For the Fiscal Year Ending June 30	Recognized Net Deferred Outflows (Inflows) of Resources (Explicit)	Recognized Net Deferred Outflows (Inflows) of Resources (Implicit)	Total
2019	\$ (18,920)	\$ (4,069)	\$ (22,989)
2020	(18,920)	(4,069)	(22,989)
2021	(18,920)	(4,069)	(22,989)
2022	(18,921)	(4,069)	(22,990)
2023	(11,472)	(4,069)	(15,541)
Thereafter	(48,646)	(17,252)	(65,898)

The Expected Average Remaining Service life was 10.24 years. This is the period used to recognize changes in the OPEB liability other than those arising from investments gains and losses or relating to improvements in plan benefits.

10. Reliance Bankruptcy

The Authority has purchased insurance, and reinsurance, policies with Reliance Insurance Company. On May 29, 2001, Reliance was taken over by the State of Pennsylvania Insurance Department and is in the process of being liquidated. The State of Pennsylvania Department of Insurance was appointed as the liquidator. The Authority had coverage with Reliance for three of its programs: EWC, PGL, and Medical Malpractice. Although the Authority paid PGL claims that would have been covered by Reliance, the Authority is no longer pursuing any claims in bankruptcy. The Authority has received \$1.4M in recovery of Medical Malpractice claims, to resolve all outstanding claims against Reliance in this program. The Authority estimates that the ultimate cost of the EWC claims for 1996/97, insured by Reliance Insurance Company, which are not covered by CIGA, is \$793k and is included in claims liabilities as of June 30, 2019.

11. Castlepoint Liquidation

August 2016, the California Insurance Commissioner placed Castlepoint Insurance Companies (Castlepoint) in conservatorship. Castlepoint has been in liquidation since March 1, 2017. CIGA is administering the liquidation and paying claims. The Authority has insured the 2010/11 and 2011/12 years in the PWC Program in the layer from \$10k to \$125k with Castlepoint. Although CIGA has paid on some claims, it has issued denials if "other insurance" is available to cover the exposure. The total exposure to the PWC Program that is considered unrecoverable is approximately \$900K, discounted, and this amount is included in claim liabilities in the PWC program.

The EWC Program also had coverage through Castlepoint on a quota-share basis in the 2010/11 and 2011/12 years on an 80% quota-share basis for the \$1M excess of SIR layer. Here, because CIGA's coverage is limited to \$500k per claim, the program does have exposure due to the liquidation. Additionally, CIGA has issued denials if "other insurance" is available to cover the exposure. The Authority estimates the ultimate cost of the EWC claims for this period, not covered by CIGA, to be \$3.9M, discounted, and this amount is included in claim liabilities in the EWC program.

**CSAC EXCESS INSURANCE AUTHORITY
NOTES TO THE FINANCIAL STATEMENTS
FOR THE FISCAL YEARS ENDED JUNE 30, 2019 AND 2018**

12. Litigation

In 2017, the EIA's building suffered significant water intrusion during several storms. Experts opined that this was due to defects in the original construction of the building. The EIA has since spent around \$1.1M to correct those defects and has litigation pending against the builder to recover the amounts expended. Trial on the matter is set for March 2020.

Notes to Schedule

Valuation Date:

Actuarially determined contribution rates are calculated as of June 30, 2018 and June 30, 2019 on the June 30, 2017 Valuation.

Methods and assumptions used:

Discount Rate	7.28%
Actuarial Cost method	Entry age
Amortization method	Level dollar payment
Amortization period	19 Year closed
Asset Valuation method	Market value of assets
Inflation	2.75%
Healthcare cost trend rates	8.0% in 2018 to 5% in steps of .5%
Salary increases	3.25% per year
Retirement age	Age 50 (age 52 if a miscellaneous employee hired after 1/1/2013)
Mortality	CalPERS 2014 Experience Study
Mortality Improvement	MacLeod Watts Scale 2017 generationally

REQUIRED SUPPLEMENTAL INFORMATION
ALL PROGRAMS
NOTES TO EARNED PREMIUMS AND CLAIMS DEVELOPMENT INFORMATION
FOR THE TEN-YEAR PERIOD ENDED JUNE 30, 2019**

The following schedule illustrates how the Fund's earned premiums (net of reinsurance) and investment income compare to related costs of loss (net of loss assumed by reinsurers) and other expenses assumed by the Fund as of the end of each of the last 10 years. The rows of the schedule are defined as follows:

1. This line shows the total of each fiscal year's earned premium, revenues ceded to reinsurers and stop-loss policies, and investment revenues. The total revenues are net of dividends returned to members.
2. This line shows the amount of reported unallocated claim adjustment expenses and reported other costs not allocated to individual claims.
3. This line shows the Fund's incurred claims and allocated claim adjustment expense (both paid and accrued) as originally reported at the end of the first year in which the event occurred that triggered coverage under the contract (called policy year).
4. This section of rows shows the cumulative amounts paid as of the end of each successive year for each policy year.
5. This line shows the latest reestimated amount of claims assumed by reinsurers as of the end of the current year for each policy year.
6. This section of rows shows how each policy year's incurred claims increased or decreased as of the end of each successive year. These annual reestimations result from new information received on known claims, reevaluation of existing information on known claims, and emergence of new claims not previously known.
7. This line compares the latest reestimated incurred claims amount to the amount originally established (line 3) and shows whether this latest estimate of claims cost is greater or less than originally thought.

As data for individual policy years mature, the correlation between original estimates and reestimated amounts is commonly used to evaluate the accuracy of incurred claims currently recognized in less mature policy years.

The columns of the schedule show data for successive policy years.

REQUIRED SUPPLEMENTAL INFORMATION
PRIMARY WORKERS' COMPENSATION PROGRAM
NOTES TO EARNED PREMIUMS AND CLAIMS DEVELOPMENT INFORMATION
FOR THE TEN-YEAR PERIOD ENDED JUNE 30, 2019**

The following schedule illustrates how the Fund's earned premiums (net of reinsurance) and investment income compare to related costs of loss (net of loss assumed by reinsurers) and other expenses assumed by the Fund as of the end of each of the last 10 years. The rows of the schedule are defined as follows:

1. This line shows the total of each fiscal year's earned premium, revenues ceded to reinsurers and stop-loss policies, and investment revenues. The total revenues are net of dividends returned to members.
2. This line shows the amount of reported unallocated claim adjustment expenses and reported other costs not allocated to individual claims.
3. This line shows the Fund's incurred claims and allocated claim adjustment expense (both paid and accrued) as originally reported at the end of the first year in which the event occurred that triggered coverage under the contract (called policy year).
4. This section of rows shows the cumulative amounts paid as of the end of each successive year for each policy year.
5. This line shows the latest reestimated amount of claims assumed by reinsurers as of the end of the current year for each policy year.
6. This section of rows shows how each policy year's incurred claims increased or decreased as of the end of each successive year. These annual reestimations result from new information received on known claims, reevaluation of existing information on known claims, and emergence of new claims not previously known.
7. This line compares the latest reestimated incurred claims amount to the amount originally established (line 3) and shows whether this latest estimate of claims cost is greater or less than originally thought.

As data for individual policy years mature, the correlation between original estimates and reestimated amounts is commonly used to evaluate the accuracy of incurred claims currently recognized in less mature policy years.

The columns of the schedule show data for successive policy years.

REQUIRED SUPPLEMENTAL INFORMATION
EXCESS WORKERS' COMPENSATION PROGRAM
NOTES TO EARNED PREMIUMS AND CLAIMS DEVELOPMENT INFORMATION
FOR THE TEN-YEAR PERIOD ENDED JUNE 30, 2019**

The following schedule illustrates how the Fund's earned premiums (net of reinsurance) and investment income compare to related costs of loss (net of loss assumed by reinsurers) and other expenses assumed by the Fund as of the end of each of the last 10 years. The rows of the schedule are defined as follows:

1. This line shows the total of each fiscal year's earned premium, revenues ceded to reinsurers and stop-loss policies, and investment revenues. The total revenues are net of dividends returned to members.
2. This line shows the amount of reported unallocated claim adjustment expenses and reported other costs not allocated to individual claims.
3. This line shows the Fund's incurred claims and allocated claim adjustment expense (both paid and accrued) as originally reported at the end of the first year in which the event occurred that triggered coverage under the contract (called policy year).
4. This section of rows shows the cumulative amounts paid as of the end of each successive year for each policy year.
5. This line shows the latest reestimated amount of claims assumed by reinsurers as of the end of the current year for each policy year.
6. This section of rows shows how each policy year's incurred claims increased or decreased as of the end of each successive year. These annual reestimations result from new information received on known claims, reevaluation of existing information on known claims, and emergence of new claims not previously known.
7. This line compares the latest reestimated incurred claims amount to the amount originally established (line 3) and shows whether this latest estimate of claims cost is greater or less than originally thought.

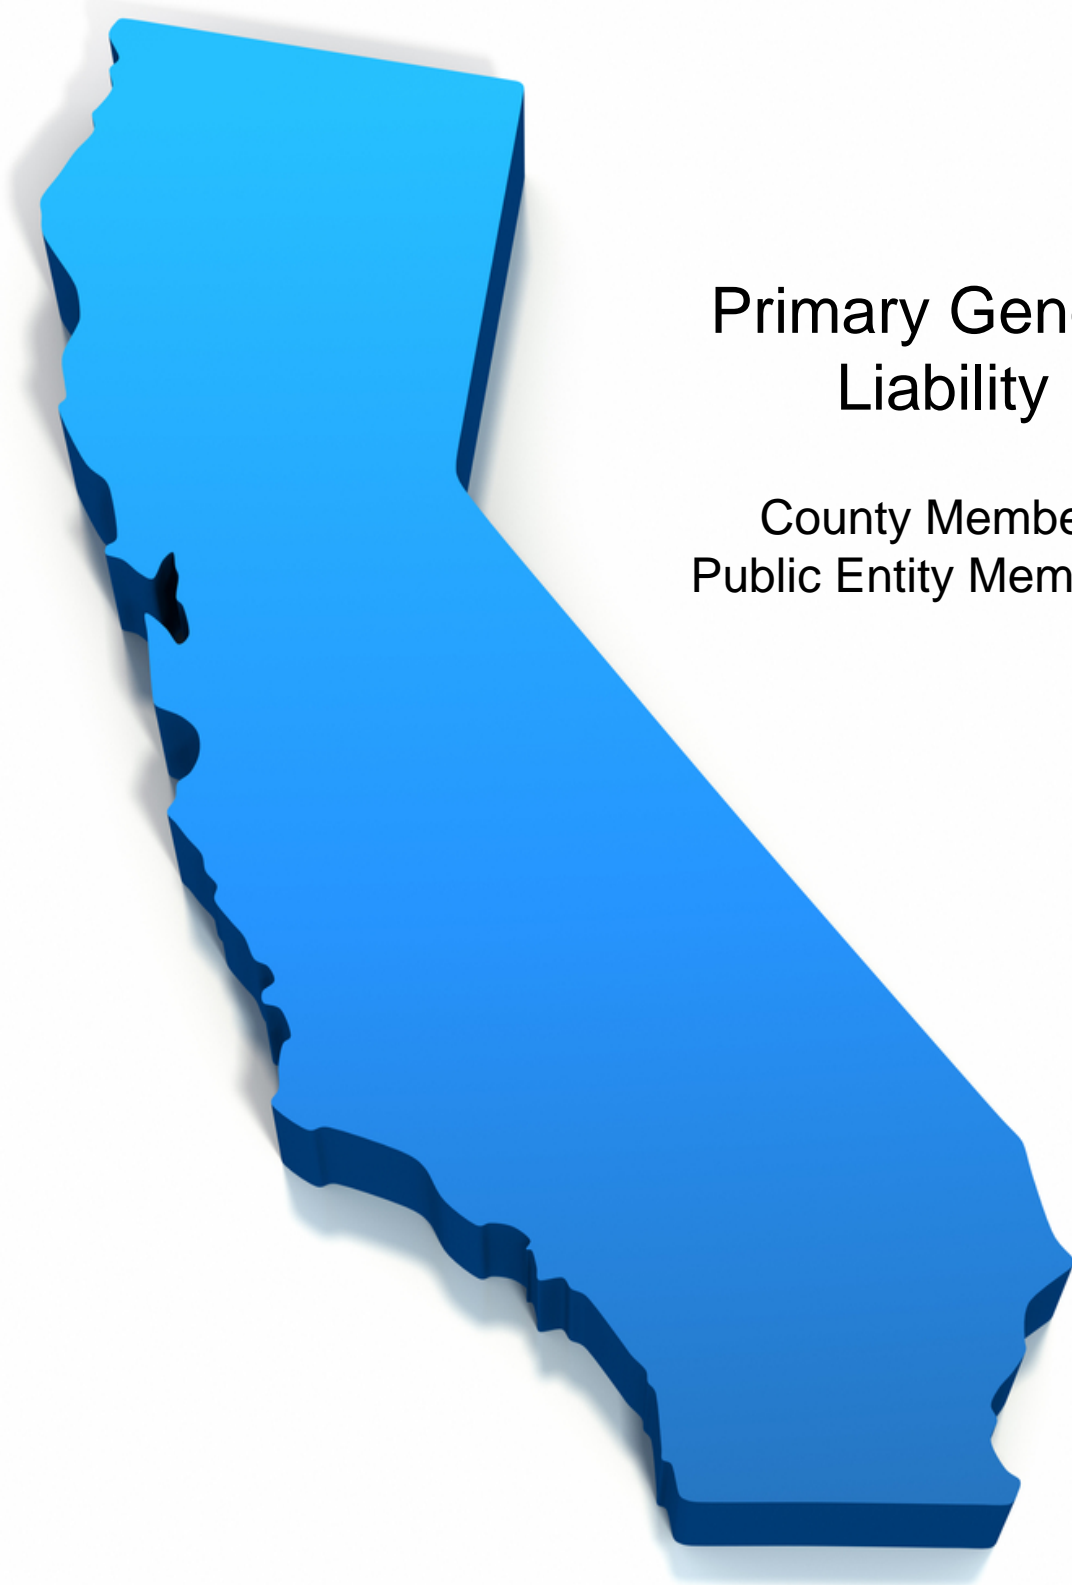

As data for individual policy years mature, the correlation between original estimates and reestimated amounts is commonly used to evaluate the accuracy of incurred claims currently recognized in less mature policy years.

The columns of the schedule show data for successive policy years.

GENERAL LIABILITY 1 PROGRAM
NOTES TO EARNED P REQUIRED SUPPLEMENTAL INFORMATION
PREMIUMS AND CLAIMS DEVELOPMENT INFORMATION
FOR THE TEN-YEAR PERIOD ENDED JUNE 30, 2019**

The following schedule illustrates how the Fund's earned premiums (net of reinsurance) and investment income compare to related costs of loss (net of loss assumed by reinsurers) and other expenses assumed by the Fund as of the end of each of the last 10 years. The rows of the schedule are defined as follows:

1. This line shows the total of each fiscal year's earned premium, revenues ceded to reinsurers and stop-loss policies, and investment revenues. The total revenues are net of dividends returned to members.
2. This line shows the amount of reported unallocated claim adjustment expenses and reported other costs not allocated to individual claims.
3. This line shows the Fund's incurred claims and allocated claim adjustment expense (both paid and accrued) as originally reported at the end of the first year in which the event occurred that triggered coverage under the contract (called policy year).
4. This section of rows shows the cumulative amounts paid as of the end of each successive year for each policy year.
5. This line shows the latest reestimated amount of claims assumed by reinsurers as of the end of the current year for each policy year.
6. This section of rows shows how each policy year's incurred claims increased or decreased as of the end of each successive year. These annual reestimations result from new information received on known claims, reevaluation of existing information on known claims, and emergence of new claims not previously known.
7. This line compares the latest reestimated incurred claims amount to the amount originally established (line 3) and shows whether this latest estimate of claims cost is greater or less than originally thought.

As data for individual policy years mature, the correlation between original estimates and reestimated amounts is commonly used to evaluate the accuracy of incurred claims currently recognized in less mature policy years.

The columns of the schedule show data for successive policy years.

REQUIRED SUPPLEMENTAL INFORMATION
GENERAL LIABILITY 2 PROGRAM
NOTES TO EARNED PREMIUMS AND CLAIMS DEVELOPMENT INFORMATION
FOR THE TEN-YEAR PERIOD ENDED JUNE 30, 2019**

The following schedule illustrates how the Fund's earned premiums (net of reinsurance) and investment income compare to related costs of loss (net of loss assumed by reinsurers) and other expenses assumed by the Fund as of the end of each of the last 10 years. The rows of the schedule are defined as follows:

1. This line shows the total of each fiscal year's earned premium, revenues ceded to reinsurers and stop-loss policies, and investment revenues. The total revenues are net of dividends returned to members.
2. This line shows the amount of reported unallocated claim adjustment expenses and reported other costs not allocated to individual claims.
3. This line shows the Fund's incurred claims and allocated claim adjustment expense (both paid and accrued) as originally reported at the end of the first year in which the event occurred that triggered coverage under the contract (called policy year).
4. This section of rows shows the cumulative amounts paid as of the end of each successive year for each policy year.
5. This line shows the latest reestimated amount of claims assumed by reinsurers as of the end of the current year for each policy year.
6. This section of rows shows how each policy year's incurred claims increased or decreased as of the end of each successive year. These annual reestimations result from new information received on known claims, reevaluation of existing information on known claims, and emergence of new claims not previously known.
7. This line compares the latest reestimated incurred claims amount to the amount originally established (line 3) and shows whether this latest estimate of claims cost is greater or less than originally thought.

As data for individual policy years mature, the correlation between original estimates and reestimated amounts is commonly used to evaluate the accuracy of incurred claims currently recognized in less mature policy years.

The columns of the schedule show data for successive policy years.

1. This line shows the total of each fiscal year's earned premium, revenues ceded to reinsurers and stop-loss policies, and investment revenues. The total revenues are net of dividends returned to members.
2. This line shows the amount of reported unallocated claim adjustment expenses and reported other costs not allocated to individual claims.
3. This line shows the Fund's incurred claims and allocated claim adjustment expense (both paid and accrued) as originally reported at the end of the first year in which the event occurred that triggered coverage under the contract (called policy year).
4. This section of rows shows the cumulative amounts paid as of the end of each successive year for each policy year.
5. This line shows the latest reestimated amount of claims assumed by reinsurers as of the end of the current year for each policy year.
6. This section of rows shows how each policy year's incurred claims increased or decreased as of the end of each successive year. These annual reestimations result from new information received on known claims, reevaluation of existing information on known claims, and emergence of new claims not previously known.
7. This line compares the latest reestimated incurred claims amount to the amount originally established (line 3) and shows whether this latest estimate of claims cost is greater or less than originally thought.

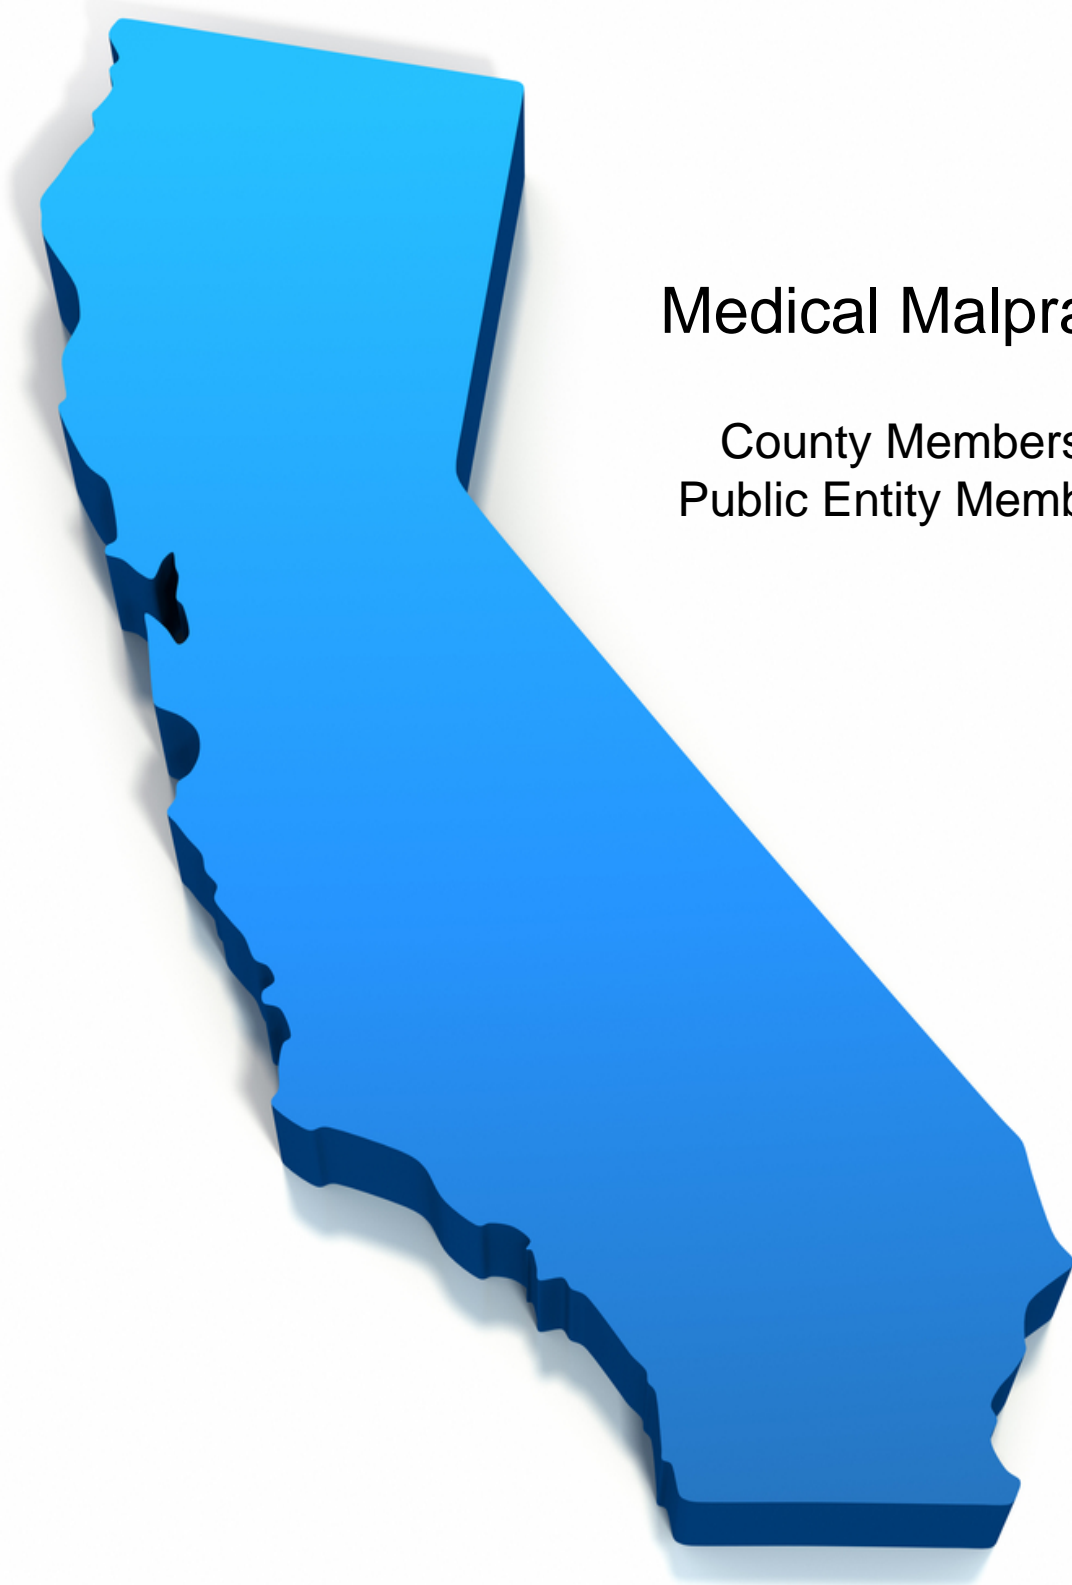

As data for individual policy years mature, the correlation between original estimates and reestimated amounts is commonly used to evaluate the accuracy of incurred claims currently recognized in less mature policy years.

The columns of the schedule show data for successive policy years.

REQUIRED SUPPLEMENTAL INFORMATION
MEDICAL MALPRACTICE PROGRAM
NOTES TO EARNED PREMIUMS AND CLAIMS DEVELOPMENT INFORMATION
FOR THE TEN-YEAR PERIOD ENDED JUNE 30, 2019**

The following schedule illustrates how the Fund's earned premiums (net of reinsurance) and investment income compare to related costs of loss (net of loss assumed by reinsurers) and other expenses assumed by the Fund as of the end of each of the last 10 years. The rows of the schedule are defined as follows:

1. This line shows the total of each fiscal year's earned premium, revenues ceded to reinsurers and stop-loss policies, and investment revenues. The total revenues are net of dividends returned to members.
2. This line shows the amount of reported unallocated claim adjustment expenses and reported other costs not allocated to individual claims.
3. This line shows the Fund's incurred claims and allocated claim adjustment expense (both paid and accrued) as originally reported at the end of the first year in which the event occurred that triggered coverage under the contract (called policy year).
4. This section of rows shows the cumulative amounts paid as of the end of each successive year for each policy year.
5. This line shows the latest reestimated amount of claims assumed by reinsurers as of the end of the current year for each policy year.
6. This section of rows shows how each policy year's incurred claims increased or decreased as of the end of each successive year. These annual reestimations result from new information received on known claims, reevaluation of existing information on known claims, and emergence of new claims not previously known.
7. This line compares the latest reestimated incurred claims amount to the amount originally established (line 3) and shows whether this latest estimate of claims cost is greater or less than originally thought.

As data for individual policy years mature, the correlation between original estimates and reestimated amounts is commonly used to evaluate the accuracy of incurred claims currently recognized in less mature policy years.

The columns of the schedule show data for successive policy years.

REQUIRED SUPPLEMENTAL INFORMATION
DENTAL PROGRAM
NOTES TO EARNED PREMIUMS AND CLAIMS DEVELOPMENT INFORMATION
FOR THE TEN-YEAR PERIOD ENDED JUNE 30, 2019**

The following schedule illustrates how the Fund's earned premiums (net of reinsurance) and investment income compare to related costs of loss (net of loss assumed by reinsurers) and other expenses assumed by the Fund as of the end of each of the last 10 years. The rows of the schedule are defined as follows:

1. This line shows the total of each fiscal year's earned premium, revenues ceded to reinsurers and stop-loss policies, and investment revenues. The total revenues are net of dividends returned to members.
2. This line shows the amount of reported unallocated claim adjustment expenses and reported other costs not allocated to individual claims.
3. This line shows the Fund's incurred claims and allocated claim adjustment expense (both paid and accrued) as originally reported at the end of the first year in which the event occurred that triggered coverage under the contract (called policy year).
4. This section of rows shows the cumulative amounts paid as of the end of each successive year for each policy year.
5. This line shows the latest reestimated amount of claims assumed by reinsurers as of the end of the current year for each policy year.
6. This section of rows shows how each policy year's incurred claims increased or decreased as of the end of each successive year. These annual reestimations result from new information received on known claims, reevaluation of existing information on known claims, and emergence of new claims not previously known.
7. This line compares the latest reestimated incurred claims amount to the amount originally established (line 3) and shows whether this latest estimate of claims cost is greater or less than originally thought.

As data for individual policy years mature, the correlation between original estimates and reestimated amounts is commonly used to evaluate the accuracy of incurred claims currently recognized in less mature policy years.

The columns of the schedule show data for successive policy years.

REQUIRED SUPPLEMENTAL INFORMATION
EXCESS INSURANCE ORGANIZATION
NOTES TO EARNED PREMIUMS AND CLAIMS DEVELOPMENT INFORMATION
FOR THE TEN-YEAR PERIOD ENDED JUNE 30, 2019**

The following schedule illustrates how the Fund's earned premiums (net of reinsurance) and investment income compare to related costs of loss (net of loss assumed by reinsurers) and other expenses assumed by the Fund as of the end of each of the last 10 years. The rows of the schedule are defined as follows:

1. This line shows the total of each fiscal year's earned premium, revenues ceded to reinsurers and stop-loss policies, and investment revenues. The total revenues are net of dividends returned to members.
2. This line shows the amount of reported unallocated claim adjustment expenses and reported other costs not allocated to individual claims.
3. This line shows the Fund's incurred claims and allocated claim adjustment expense (both paid and accrued) as originally reported at the end of the first year in which the event occurred that triggered coverage under the contract (called policy year).
4. This section of rows shows the cumulative amounts paid as of the end of each successive year for each policy year.
5. This line shows the latest reestimated amount of claims assumed by reinsurers as of the end of the current year for each policy year.
6. This section of rows shows how each policy year's incurred claims increased or decreased as of the end of each successive year. These annual reestimations result from new information received on known claims, reevaluation of existing information on known claims, and emergence of new claims not previously known.
7. This line compares the latest reestimated incurred claims amount to the amount originally established (line 3) and shows whether this latest estimate of claims cost is greater or less than originally thought.

As data for individual policy years mature, the correlation between original estimates and reestimated amounts is commonly used to evaluate the accuracy of incurred claims currently recognized in less mature policy years.

The columns of the schedule show data for successive policy years.

STATISTICAL SECTION

This part of the CSAC Excess Insurance Authority's comprehensive annual financial report presents detailed information as a context for understanding what the information in the financial statements, note disclosures, and required supplementary information says about the Authority's overall financial health.

Financial Trends

These schedules contain trend information to help the reader understand how the government's financial performance and well-being have changed over time. They show how revenues and expenses have developed over years. They show how our Net Position has increased, then fallen and increased again.

	<u>Page</u>
Schedule of Net Position	204
Schedule of Revenues, Expenses and Changes in Net Position	205
History of Dividends Returned to Members	206

Demographic and Economic Information

These schedules offer demographic and economic information indicators to help the reader understand the environment within which the Authority's financial activities take place. The number of Workers' Compensation, General Liability I, Property, and Medical Malpractice claims is an indicator of the Provision for Claims. Payrolls for Workers' Compensation and General Liability I, together with claims experience are an indicator for premium revenues. Property values are indicators for Property premiums.

	<u>Page</u>
Economic Statistics	207
Number of Claims	208
Property Values.....	209

Operating Information

These schedules contain information regarding Authority employees by department, member participation by program, and the growth of office space.

	<u>Page</u>
Economic Indicators and Information.....	210

Schedules showing trends for property tax rates and revenues along with corresponding assessed valuations are not presented since the Authority does not levy such taxes.

Schedules showing bonded debt and related legal debt ratios are also not applicable.

ECONOMIC INDICATORS AND INFORMATION
FOR THE 10-YEAR PERIOD ENDING JUNE 30, 2019**

The best economic indicator of the financial stability for the CSAC Excess Insurance Authority is the estimation of incurred claims expense (line 6) and claims paid (line 3) reported in the Schedule of Claim Development and Earned Assessments in the Required Supplemental Information section of the CAFR's Financial Section. Other relevant economic and demographic information would include trends for the number of claims, covered payrolls, property values, and EIAHealth employees and lives covered as shown on the following charts.
