

GUARD1 Product Information for PRISM Members

GUARD1

GUARD1 manages officer tasks and alerts administrators if any are late.

Q: What is GUARD1?

GUARD1 documents proof of presence in corrections, security and other government applications.

Q: How does GUARD1 benefit PRISM members?

In adult and juvenile correctional facilities, GUARD1 **documents well-being checks** and services provided to offenders. It enables administrators to know that **required tasks have been completed**.

Q: Why is well-being check documentation important?

It is **required by law**. California Code of Regulations Title 15 defines requirements for direct visual observation of inmates.

It is **subject to State inspection**. The Board of State and Community Corrections performs regular inspections that include documentation of well-being checks.

It **prevents legal liability**. Deaths in custody happen. When they do, the result is scrutiny from media and government – and lawsuits. Proof that officers and staff performed their legally mandated duty of care can reduce or eliminate liability. Lack of documentation can result in judgments in the hundreds of thousands or millions of dollars.

Q: How does GUARD1 benefit jail administrators?

In a time of staffing challenges, GUARD1 makes officers and staff efficient by **replacing paper records** and managing staff tasks. Administrators receive **immediate alerts** if required tasks are late or missed.

Q: What other benefits does GUARD1 offer for correctional facilities?

GUARD1 is part of a complete system that includes **personal alarms** for staff and real time tracking of individuals and things with a facility.

Q: Are there other ways my county or municipality can use GUARD1?

At GUARD1, our business is **proof of presence**. GUARD1 can help you document staff presence and task completion. Equipment checks, building security, safety equipment checks, repairs, and much more can be documented by GUARD1.

Q: How can PRISM members purchase GUARD1?

GUARD1 pricing for members includes a **discount** negotiated for you by PRISM. Because GUARD1 was selected through a competitive process, members can purchase GUARD1 **without a RFP requirement**.
